Shape Theory Categorical Methods Of Approximation T Porter:

Shape Theory J. M. Cordier, T. Porter, 2013-12-01 This in depth treatment uses shape theory as a case study to illustrate situations common to many areas of mathematics including the use of archetypal models as a basis for systems of approximations It offers students a unified and consolidated presentation of extensive research from category theory shape theory and the study of topological algebras A short introduction to geometric shape explains specifics of the construction of the shape category and relates it to an abstract definition of shape theory Upon returning to the geometric base the text considers simplicial complexes and numerable covers in addition to Morita's form of shape theory Subsequent chapters explore Borsuk's theory of distributors the theory of exact squares Kan extensions the notion of a stable object and stability in an Abelian context The text concludes with a brief description of derived functors of the limit functor theory the concept that leads to movability and strong movability of systems and illustrations of the equivalence of strong movability and stability in many contexts

Handbook of Algebraic Topology I.M. James, 1995-07-18 Algebraic topology also known as homotopy theory is a flourishing branch of modern mathematics It is very much an international subject and this is reflected in the background of the 36 leading experts who have contributed to the Handbook Written for the reader who already has a grounding in the subject the volume consists of 27 expository surveys covering the most active areas of research They provide the researcher with an up to date overview of this exciting branch of mathematics

Computer Aided Systems Theory - EUROCAST '95 Franz Pichler, Roberto Moreno-Diaz, Rudolf F. Albrecht, 1996-01-24 This book presents a collection of revised refereed papers selected from the contributions to the Fifth International Workshop on Computer Aided Systems Theory EUROCAST 95 held in Innsbruck Austria in May 1995 The 42 full papers contained have been contributed by CAST theoreticians tool makers designers and appliers and reflect the full spectrum of activities in the area The papers are organized in sections on systems theory design environments complex systems design and specific applications

(Co)end Calculus Fosco Loregian, 2021-07-22 The language of ends and co ends provides a natural and general way of expressing many phenomena in category theory in the abstract and in applications Yet although category theoretic methods are now widely used by mathematicians since co ends lie just beyond a first course in category theory they are typically only used by category theorists for whom they are something of a secret weapon This book is the first systematic treatment of the theory of co ends Aimed at a wide audience it presents the co end calculus as a powerful tool to clarify and simplify definitions and results in category theory and export them for use in diverse areas of mathematics and computer science It is organised as an easy to cite reference manual and will be of interest to category theorists and users of category theory alike

Computer Aided Systems Theory - EUROCAST '91 Franz Pichler, Roberto Moreno Diaz, 1992-04-08 This volume contains a selection of papers presented at the second European workshop EUROCAST 91 held in Krems Austria in April 1991 It gives an overview of the current state of Computer Aided Systems Theory research and its relation to CAD

applications in the engineering fields CAST research requires the application of the most advanced information processing technology in software and hardware for the implementation of CAST method base systems Engineers in the field of information and control engineering have the opportunity in CAST to present the state of the art in modeling tools to computer scientists EUROCAST 91 proved that CAST research is still in an early state of development The papers in the volume are organized into sections on systems theory and CAST methodology modeling environments CAST method base systems and artificial vision and information and control systems

Categorical Decomposition Techniques in Algebraic Topology Gregory Arone, John Hubbuck, Ran Levi, Michael Weiss, 2012-12-06 The book consists of articles at the frontier of current research in Algebraic Topology It presents recent results by top notch experts and is intended primarily for researchers and graduate students working in the field of algebraic topology Included is an important article by Cohen Johnes and Yan on the homology of the space of smooth loops on a manifold M endowed with the Chas Sullivan intersection product as well as an article by Goerss Henn and Mahowald on stable homotopy groups of spheres which uses the cutting edge technology of topological modular forms

History of Topology I.M. James, 1999-08-24 Topology for many years has been one of the most exciting and influential fields of research in modern mathematics Although its origins may be traced back several hundred years it was Poincaré who gave topology wings in a classic series of articles published around the turn of the century While the earlier history sometimes called the prehistory is also considered this volume is mainly concerned with the more recent history of topology from Poincaré onwards As will be seen from the list of contents the articles cover a wide range of topics Some are more technical than others but the reader without a great deal of technical knowledge should still find most of the articles accessible Some are written by professional historians of mathematics others by historically minded mathematicians who tend to have a different viewpoint

Computer Aided Systems Theory - EUROCAST '93 Franz Pichler, Roberto Moreno Diaz, 1994-01-28 This volume contains a selection of papers presented at the third European Computer Aided Systems Theory workshop EUROCAST 93 held in Spain in February 1993 The workshop emphasizes interdisciplinarity with the specific goal of creating a synergy between fields such as systems theory computer science systems engineering and related areas The contributions in this volume are strongly related to current problems in CAST research They emphasize an engineering point of view concerning systems theory Since the computer is an essential instrument in CAST research there are close relations to specific topics in computer science The papers are grouped into parts on systems theory and systems technology specific methods and applications

Foundations of Software Science and Computation Structures Javier Esparza, Andrzej S. Murawski, 2017-03-15 This book constitutes the proceedings of the 20th International Conference on Foundations of Software Science and Computation Structures FOSSACS 2017 which took place in Uppsala Sweden in April 2017 held as Part of the European Joint Conferences on Theory and Practice of Software ETAPS 2017 The 32 papers presented in this volume were carefully reviewed and selected from 101 submissions They were

organized in topical sections named coherence spaces and higher order computation algebra and coalgebra games and automata automata logic and formal languages proof theory probability concurrency lambda calculus and constructive proof and semantics and category theory **Computer Aided Systems Theory - EUROCAST 2005** Roberto Moreno-Díaz, Franz Pichler, Alexis Quesada Arencibia, 2005-10-19 The concept of CAST computer aided systems Theory was introduced by F Pichler of Linz in the late 1980s to include those computer theoretical and practical developments used as tools to solve problems in system science It was considered as the third component the other two being CAD and CAM that would provide for a complete picture of the path from computer and systems sciences to practical developments in science and engineering The University of Linz organized the first CAST workshop in April 1988 which demonstrated the acceptance of the concepts by the scientific and technical community Next the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST Las Palmas February 1989 under the name EUROCAST 1989 a very successful gathering of systems theorists computer scientists and engineers from most European countries North America and Japan It was agreed that EUROCAST international conferences would be organized every two years Thus the following EUROCAST meetings took place in Krems 1991 Las Palmas 1993 Innsbruck 1995 Las Palmas 1997 Vienna 1999 Las Palmas 2001 and Las Palmas 2003 in addition to an extra European CAST conference in Ottawa in 1994 Selected papers from those meetings were published as Springer Lecture Notes in Computer Science vols 410 585 763 1030 1333 1728 2178 and 2809 and in several special issues of Cybernetics and Systems an International Journal
