

## [1] GENERAL

### 1. Features of copying functions

#### A. Touch panel

The touch panel with the back-lit LCD simplifies various operations. It also shows operation descriptions and paper jam treatment.

#### B. Various functions of digital system

Different from the conventional analog copiers, this machine employs the digital system where the image data of a document scanned by the CCD sensor (which converts photo signals into electrical signals) are converted into digital signals. This digital system allows the independent zooming copy, black-white reversing copy, and centering copy.

#### C. Front loading paper tray

The paper trays including the two-step paper feed desk employ a front loading system to facilitate paper loading.

#### D. Automatic document feeder as standard provision

Without opening the document table cover, documents can be automatically fed and copied.

The automatic document feeder provided in the A/R-250/255/255/335/335/405/501/505 allows automatic revision of documents for duplex copying as well as simplex copying. (The automatic document feeder of the A/R-250/251 allows only simplex copying.)

#### E. Step zooming

The zooming function allows selection of the magnification ratio as follows.

	Magnification ratio	Increment	Steps
A/R-250/251	25% to 200%	1%	175
A/R-250/255/335/335/335	25% to 400%	1%	375
A/R-405/501/505	25% to 400%	1%	375

#### F. Paper/magnification ratio auto selection

When the desired magnification ratio is specified, the suitable paper size is automatically selected by the original size detection function. If the copy paper size is specified, then the suitable magnification ratio is automatically selected.

#### G. 1-set 2-copy

The right and the left pages of a book, etc. can be copied onto two sheets of paper continuously.
