

Occupational Therapy Screening Test

by
Occupational Therapy for Children
&
Learning Skills 4 Kids

Purpose:

We are frequently asked by parents, teachers, RTLB's, SLS, Senco's if a child would benefit from occupational therapy. In order to answer this question, we need to do a full assessment. However as we don't want to assess children unnecessarily, a screening test enables us to identify children at risk for Occupational Therapy. Results of the screening test allow us to ascertain whether a child would benefit from a full occupational therapy assessment.

A full assessment covers the following areas in depth:

- Visual Perceptual Assessment
- Gross and fine motor Assessment
- Handwriting Assessment

Following the full assessment, a written report and a discussion with parents and teachers is completed. Thereafter an individual therapy programme is designed for the child.
