

COMPARISON: ANGULAR VELOCITY & ACCEL.

Reference velocity vectors are commensurate with angular displacement, they share the same _____

Angular velocity

Reference velocity vectors are commensurate with linear displacement, they share the same _____

Linear velocity

Using the information in the table above to answer the questions that follow:

- Q3) The Merry-Go-Round is a solid cylindrical disk, a large platform that turns and spins without slipping on wheels. The front wheel has a diameter of 20 inches, and each of the back wheels has a diameter of only 8 inches.
- as a solid object, the Merry-Go-Round, should the wheels have the same angular velocity as the Merry-Go-Round?
 - linear velocity: They are commensurate to the "size" during the process
 - Should each person have wheels 8 inches or 20 inches in diameter? How fast should they make the Merry-Go-Round spin to achieve the same? -- at that rate should I
 all spin = 200 turns
 $\omega = 200 \text{ rev/min} \times \frac{2\pi \text{ rad}}{1 \text{ rev}} = 400\pi \text{ rad/min} = 6.6667 \text{ rad/s}$
 all = 200 turns
 - at this back wheel speed, what should the angular velocity of the wheel be?
 $\omega = 200 \text{ rev/min} \times \frac{2\pi \text{ rad}}{1 \text{ rev}} = 400\pi \text{ rad/min} = 6.6667 \text{ rad/s}$
 $\omega = 200 \text{ rev/min} \times \frac{2\pi \text{ rad}}{1 \text{ rev}} = 400\pi \text{ rad/min} = 6.6667 \text{ rad/s}$

- Q4) The Merry-Go-Round is a solid cylindrical disk, a large platform that turns and spins without slipping on wheels (arrangement is right). The small wheels have a diameter of 8 inches, and the Merry-Go-Round has a diameter of 20 inches. Each wheel has a speed of only 20 turns.
- Should the Merry-Go-Round and the wheel have the same angular velocity as linear velocity? Explain
 angular velocity: They are commensurate with same size
 - The speed is being collected at a rate of 20 turns per 200 (radius) per minute. Does this experiment follow an angular velocity? Find the speed to angular velocity: 2000 turns
 angular velocity:
 $\omega = 200 \text{ rev/min} \times \frac{2\pi \text{ rad}}{1 \text{ rev}} = 400\pi \text{ rad/min} = 6.6667 \text{ rad/s}$
 $\omega = 200 \text{ rev/min} \times \frac{2\pi \text{ rad}}{1 \text{ rev}} = 400\pi \text{ rad/min} = 6.6667 \text{ rad/s}$
 - Calculate the angular and linear velocity of the Merry-Go-Round

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans *Precalculus* COMAP, 2001-07-15 COMAP's new text for the precalculus course focuses on modeling and contemporary applications [Directory of Distance Learning Opportunities](#) Modoc Press, Inc., 2003-02-28 This book provides an overview of current K 12 courses and programs offered in the United States as correspondence study or via such electronic delivery systems as satellite cable or the Internet The Directory includes over 6 000 courses offered by 154 institutions or distance learning consortium members Following an

were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century *Video Source Book* ,2006 A guide to programs currently available on video in the areas of movies entertainment general interest education sports recreation fine arts health science business industry children juvenile how to instruction
