DISCLAIMER

This resource does **NOT** replace revising all topics in the specification — thorough revision is the best preparation.

This is an informed guess — no one can predict exact exam questions. Topics are chosen based on Paper 1 analysis and areas not yet tested.

This does not replace full revision of the specification — thorough preparation remains essential.

This paper has been based around topics that did not appear on paper 1, especially ones my class haven't practised recently (e.g. alternative mean formula, linear interpolation, weighted mean, standard deviation ...).

To save time, most data is fictional! Any real statistics or graphs not created by me have been properly referenced. I do not claim authorship of the graphs in Question 7 and Question 8. All questions are original and written by me.

This isn't a perfect or exhaustive paper, but I hope it helps you prepare your classes and gives them good practice in preparation for Friday's paper 🍀
