GETTING STARTED

Insert batteries before first use, matching the polarity (+/-) and a **RESET** after each battery change.

Indicates main unit batteries are low.

NOTE: Do not use rechargeable batteries. We recommend that you use alkaline batteries with this product for longer usage and optimum batteries in temperatures below freezing.

REMOTE SENSOR

The sensor collects temperature readings approx. every 40 seconds and sends them to the main unit. The main unit can collect data from up to 3 sensors.

To set up the sensor:

1. Slide open the battery door
2. Insert the batteries, matching the polarity (+/-)
3. Select a channel. Make sure you use a different channel for each sensor.

4. Close the battery compartment
5. Secure the sensor in the desired location using the wall mount or table stand.

For best results:

- Place the sensor out of direct sunlight and moisture.
- Do not place the sensor more than 30m (100 ft) from the main (indoor) unit.
- Position the sensor so that it faces the main (indoor) unit, minimizing obstructions such as doors, walls, and furniture.
- Place the sensor in a location with a clear view to the sky, away from walls or electronic objects.
- Position the sensor close to the main unit during cold winter months as below-freezing temperatures may affect battery performance and signal transmission.

The transmission range may vary depending on many factors. You may need to experiment with various locations to get the best results.

Standard Alkaline batteries contain significant amounts of water. Because of this they will freeze in low temperatures of approximately -12°C (-10°F). Disposable Lithium batteries have a much lower threshold for temperature with an extended freezing range of below -30°C (-22°F).

Wireless ranges can be impacted by a variety of factors such as extremely cold temperatures. Extreme cold may temporarily reduce the effective range between the sensor and the base station. If the unit's performance falls due to low temperature, the unit will resume proper functioning as the temperature rises to within the normal temperature range. It is no permanent damage will occur to the unit due to low temperatures.

SENSOR OFF / NO SIGNAL ICON

The sensor reception icon in the temperature and humidity area shows the status.

ICON	DESCRIPTION

	A channel has been found and sensor signal is being received.
	The sensor cannot be found. Search for the sensor or check batteries.

To search for a sensor:

Simultaneously press and hold **MEM** and **CHANNEL** for 2 seconds.

NOTE: If the sensor is still not found, check the batteries, obstructions, and remote unit location.
