Grandparents and the Law Samantha M Davey, Jaime Lindsey, 2023-05-18 Should grandparents have rights in relation to their grandchildren If so what should the content of those rights be both procedurally and substantively And what is the appropriate role of the law in providing solutions to problems arising in the context of grandparents rights This book considers these questions from both a public and a private law perspective and analyses the human rights implications for parties such as children parents and grandparents It also explores the topic of grandparents rights in the context of the European Convention on Human Rights and the United Nations Convention on the Rights of the Child as well as in other jurisdictions such as Iran France and Nepal The book argues that grandparents rights have so far received insufficient acknowledgement and consequently that

relationships between grandparents and grandchildren have received insufficient protection. However, it is crucial that the protection of grandparents' rights is balanced with the rights of parents and the rights and welfare of children. The book considers how best to achieve this, for example in disputes on child arrangements, i.e. residence and contact, child protection matters, and in adoption cases. The book is of particular interest to all academics seeking a clear framework for the protection of grandparents' rights in private and public law proceedings.

United States Army in World War II Special Studies The Women's Army Corps, 1951 **Special Monograph** United States. Selective Service System, 1948 **Care Proceedings with an International Element** Maria Sofia Wright, 2025-10-02

Presenting the findings of a study of 100 care cases, this book provides a rigorous analysis of how jurisdictional issues are determined and how information sharing of child protection operates across borders. It draws on the first empirical study of the operation of private international law instruments, Brussels IIa and the 1996 Hague Convention, in care proceedings in England. It also illustrates how prospective carers are assessed and the routes which are used to secure legal permanence for children living overseas. In so doing, it identifies all the ways in which children's welfare interests are compromised in the cross-border context. But it does suggest solutions, identifying how private international law instruments, their interpretation and application, should be improved to promote the best interests of children. This is an impressive work which will be invaluable to both scholars and practitioners.
