

Physical Science— Light and Color

- I. The Nature of Light
 - a. Theories of light
 - i. Particle theory of light—the idea that light is a stream of physical particles—proposed by Sir Isaac Newton in his book *Opticks*
 - ii. Wave theory of light—lights consists of electromagnetic waves not particles; two transverse oscillating at right angles to each other—demonstrated by James Clerk Maxwell
 - iii. Dual nature of light—called the quantum theory of light—that light is electromagnetic waves traveling as photons (tiny bundles or packets of energy); when interacting with matter, light acts like photons, when traveling through space, photons act like electromagnetic waves
 - b. Light and color
 - i. Visible light—the frequencies of electromagnetic spectrum that the eye can detect (this is a very small portion of all light)
 - 1. Color is a the perception of frequency: red, orange, yellow, green, blue, violet
 - 2. White—all the colors
 - 3. Black—absence of visible light
 - ii. Additive primary colors—red, green, blue
 - iii. Subtractive primary colors—magenta, cyan, yellow
- II. The Behavior of Light
 - a. Reflection of light
 - i. Convex mirror—mirror is on the outside of a spherical surface
 - ii. Concave mirror—mirror is on the inside of a spherical surface (picture a headlight on a car)
 - b. Refraction—bending of light as it passes through a different medium
 - i. Applications: eyeglasses, contact lenses, cameras, binoculars, magnifying glass
 - ii. Lens—a piece of glass designed to bend light rays
 - iii. Natural occurrences of refraction: mirage, scintillation, rainbow
 - c. Interference—constructive and destructive
 - d. Diffraction—for example, the blurring at the edge of a shadow
- III. Electromagnetic Radiation: radio waves, microwaves, infrared waves, visible light, ultraviolet waves, x-rays, gamma rays (the higher the frequency, the more powerful the wave)
 - a. Radio waves—used for many forms of communication: radio, television, cellular phones
 - b. Microwaves—used in microwave ovens, satellite communications, GPS, radar (used to measure the distance and direction of faraway objects)
 - c. Infrared waves—also known as heat rays, used by heat lamps, and infrared video cameras

Science Curriculum Guide John Stringer, 2013-06-17 This guide provides trainee teachers with an insight into the nature and teaching of primary science It aims to introduce you to the ways in which children learn science and to the science itself Each Unit can be studied independently or used to support prepare for school experiences You will be directed towards additional reading which will develop or confirm the subject knowledge you will need to achieve QTS the curriculum guide is up to date revised to take account of Curriculum 2000 and accepted good practice in primary science teaching and learning It is also flexible many of the Units are stand alone They can be undertaken in any order at your own pace to complement school experiences The Units are practical and feasible the activities suggested can be undertaken by the non specialist in many cases without specialized equipment or access to large numbers of pupils The guide is comprehensive covering all the primary science elements in Curriculum 2000 and giving background information into other aspects of primary science teaching It is also supportive the guide suggests further texts to support trainees own understanding of the scientific and pedagogical concepts involved Additional reading draws on the TTA s list of approved key texts The original text was piloted by students following a distance learning PGCE course It has been revised and updated in line with their comments and to meet Curriculum 2000 and Curriculum Guidance for the Foundation Stage The text was initially developed as a core text for the part time distance learning course at Liverpool Hope and is designed for trainee teachers on distance learning and flexible routes returning converting or overseas teachers **Resources for Teaching Middle School Science**

Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students

in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents

Science Curriculum Topic Study Page Keeley,Joyce Tugel,2019-09-11 Today's science standards reflect a new vision of teaching and learning How to make this vision happen Scientific literacy for all students requires a

deep understanding of the three dimensions of science education disciplinary content scientific and engineering practices and crosscutting concepts If you actively engage students in using and applying these three dimensions within curricular topics they will develop a scientifically based and coherent view of the natural and designed world The latest edition of this best seller newly mapped to the Framework for K 12 Science Education and the Next Generation Science Standards NGSS and updated with new standards and research based resources will help science educators make the shifts needed to reflect current practices in curriculum instruction and assessment The methodical study process described in this book will help readers intertwine content practices and crosscutting concepts The book includes An increased emphasis on STEM including topics in science technology and engineering 103 separate curriculum topic study guides arranged in six categories Connections to content knowledge curricular and instructional implications concepts and specific ideas research on student learning K 12 articulation and assessment Teachers and those who support teachers will appreciate how Curriculum Topic Study helps them reliably analyze and interpret their standards and translate them into classroom practice thus ensuring that students achieve a deeper understanding of the natural and designed world Environmental Science: Systems and Solutions Michael L. McKinney,Robert M. Schoch,Logan Yonavjak,Grant Mincy,2017-12-01 Putting the Science Back into the Environment What is the big picture in environmental science Our authors know and effectively communicate it in Environmental Science Systems and Solutions Sixth Edition Whether you view the subject through a scientific social political or historical lens you ll find the concrete foundations here that work for courses in both environmental science and environmental studies A systems approach is the connective fabric that makes sense of the wealth of topics and data which demonstrates how aspects of the natural environment interconnect with each other and with human society A section on Resource Use and Management introduces the concept of sustainability and another on Dealing with Environmental Degradation discusses threats to the environment and mitigation strategies A bonus section available online on Social Solutions to Environmental Concerns discusses the complex issues impacting the environment and the scientific technologic and human behavioral ways to address them Throughout the text you will find the hard data necessary for a scientific study of the environment and the measured analysis ideal for our time Combining evidence based contemporary information and data with relevant case studies practical applications numerous calculations and modern references Environmental Science Systems and Solutions teaches and engages Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook with two bonus chapters not found in the printed text student practice activities and assessments a full suite of instructor resources and learning analytics reporting tools Thought provoking case studies of current and relevant issues encourage critical thinking Unique What s The Evidence feature invites the reader to review arguments and determine their validity Updated data and statistics and additional tables provide a fresh and current picture of the subject An expanded selection of calculations problems challenges the student and encourages them to apply new
