

CONTINGENCY TABLES

A contingency table is a tabular display that subdivides data, often into "male" and "female" and often looking at how many of each do X and how many of each do Y and so on.

The rows and columns are usually totalled. The number in the lower right corner of the table tells us the value of n , the total sample size.

We can read many different probabilities using the information in a contingency table.

Example 1

A survey was done to see how many Grade 8 students owned an iPad. The results are shown in the contingency table below.

	Owens an iPad	Doesn't own an iPad	TOTAL
Male	7	4	11
Female	3	6	9
TOTAL	10	10	20

Notice that the rows and columns both total to 20. This means that a total of 20 students participated in the survey.

When reading probabilities, the most important thing is to identify the correct sample space.

- The probability that a randomly selected student is male = $\frac{11}{20}$
- The probability that a randomly selected male student owns an iPad = $\frac{7}{11}$

Worksheet 24: Contingency tables

- A tournament organiser conducted a survey among 100 members of Paradise Sports Club to find out whether they play darts or not. The results are shown in the table below.

	Playing darts	Not playing darts	TOTAL
Male	30	40	70
Female	24		
TOTAL	54	46	100

- Complete the table by filling in the missing values.

- What is the probability that a member selected at random:

- Is female.

- Is male.

- Is female and plays darts.

- Is male and does not play darts.

Bayesian Psychometric Modeling Roy Levy, Robert J. Mislevy, 2017-07-28 A Single Cohesive Framework of Tools and Procedures for Psychometrics and Assessment Bayesian Psychometric Modeling presents a unified Bayesian approach across traditionally separate families of psychometric models It shows that Bayesian techniques as alternatives to conventional approaches offer distinct and profound advantages in achieving many goals of psychometrics Adopting a Bayesian approach can aid in unifying seemingly disparate and sometimes conflicting ideas and activities in psychometrics This book explains both how to perform psychometrics using Bayesian methods and why many of the activities in psychometrics align with Bayesian thinking The first part of the book introduces foundational principles and statistical models including conceptual issues normal distribution models Markov chain Monte Carlo estimation and regression Focusing more directly on psychometrics the second part covers popular psychometric models including classical test theory factor analysis item response theory latent class analysis and Bayesian networks Throughout the book procedures are illustrated using examples primarily from educational assessments A supplementary website provides the datasets WinBUGS code R code and Netica files used in the examples *Creative Thinking Homework Assignments for Junior High School Science* John Edward Lutz, 1965 *Investigations in Mathematics Education*, 1979 *Proceedings of the International Conference on Information Systems Design and Intelligent Applications 2012 (India 2012) held in Visakhapatnam, India, January 2012* Suresh Chandra Satapathy, P S Avadhani, Ajith Abraham, 2011-12-14 This volume contains the papers presented at INDIA 2012 International conference on Information system Design and Intelligent Applications held on January 5 7 2012 in Vishakhapatnam India This conference was organized by Computer Society of India CSI Vishakhapatnam chapter well supported by Vishakhapatnam Steel RINL Govt of India It contains 108 papers contributed by authors from six different countries across four continents These research papers mainly focused on intelligent applications and various system design issues The papers cover a wide range of topics of computer science and information technology discipline ranging from image processing data base application data mining grid and cloud computing bioinformatics among many others The various intelligent tools like swarm intelligence artificial intelligence evolutionary algorithms bio inspired algorithms have been applied in different papers for solving various challenging IT related problems **Resources and Sustainable Development III** Xi Xi Lu, Kin Che Lam, He Xu, Zhi Bin Jia, 2014-06-18 2014 International Conference on Energy and Environmental Protection ICEEP 2014 April 26 28 2014 Xi an China **Airman Assignments** United States. Web Intelligence and Security Mark Last,Abraham Kandel,2010 *Indiana Register* ,1983 *Homework, Learning and Academic Success: The Role of Family and Contextual Variables* Antonio Valle,Susana Rodríguez,Pedro Rosário,Mar Lorenzo Moledo,2020-02-24 The main purpose of this Research Topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework This will require studying the role played by teachers students and families in order to

ensure that schoolwork is a useful learning tool Although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework However the time spent on homework is not in itself evidence of the student's involvement nor is time spent indicative of quality time Indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence It is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation In tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central players in the process of completing homework assignments The decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student's motivation and the student's level of engagement with homework Furthermore the fact that homework is useful interesting and motivating for students will depend on how the teacher prescribes those tasks and the connection established with classroom learning Teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework Lastly the effectiveness of teacher feedback depends on its contribution to the student's educational progress and how that student will perform in the future In addition to the student who performs the task and the teacher who prescribes and corrects it we must not lose sight of parents' role Although there are discrepancies regarding the role that parents play in relation to homework it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out Everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties In this way providing emotional support encouraging children to get involved can contribute positively to improving their motivation and interest in the performance of homework The objective of this Research Topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process its prescription and correction Overall we aim to cease making homework a source of conflict and controversy at the socio educational level in order to provide useful instruments for improving the quality of student learning This work was developed with the financing of the research projects EDU2013 44062 P MINECO EDU2017 82984 P MEIC

a the directions of wave propagation of the e field and of b field are all mutually perpendicular b the speed of the electromagnetic wave is the speed of light $c = \frac{1}{\sqrt{\epsilon_0 \mu_0}}$ independent of frequency c the ratio of electric and magnetic field amplitudes is

waves review answers the physics classroom - Sep 19 2023

answer d the given info allows you to determine the speed of the wave $v = \frac{d}{t} = \frac{2 \text{ m}}{0.5 \text{ s}} = 4 \text{ m/s}$ if there are 3 waves in a 2 meter long rope then each wave is $\frac{2}{3}$ meter long now find frequency with the equation $v = f \lambda$ where $v = 4 \text{ m/s}$ and $\lambda = 0.667 \text{ m}$
