Restructuring Universities Geoffrey Walford,2018-10-11 Originally published in 1987 Restructuring Universities uses Aston University as a case study of the internal restructuring taking place in universities Aston lost one third of its funding in 1981 and was told to reduce its student numbers by one fifth within three years The university has a balanced financial budget well oversubscribed courses and the average A level scores of entrants are over the national average in all subjects taught The book looks at the ways in which the university dealt with rapid change looking particularly at the decision making processes within the university and the ways in which internal power and politics influenced decisions made Previous models of decision making are discussed and a new political model outlined The book provides a useful and informed analysis of the context politics and management of change in the university system **The Green Bottom Line** Martin Bennett,Peter James,2017-09-29 To date both internal and external corporate environmental reporting and management systems have focused on physical input output measures However external stakeholders are increasingly demanding that organisations provide more financial information about the costs and benefits of their environmental actions As environmental costs rise internal decision makers are also seeking such information to ensure that money is well spent Beyond basic compliance many companies will not countenance environmental actions for which a business case cannot be made A number of companies such as Baxter BT Xerox Zeneca and others are now beginning to develop a better understanding of the costs and benefits of environmental action The US Environmental Protection Agency has also done considerable work on models designed to understand the full costs of pollution control investments with the aim of demonstrating that when these are properly considered pollution prevention can be a more cost effective alternative The

Green Bottom Line brings together much of the world's leading research and best practice case studies on the topic. Divided into four sections covering General Concepts, Empirical Studies, Case Studies, and Implementation, the book includes case studies from the US EPA's Environment Accounting Programme and contributions from authors at institutions including the IMD, INSEAD, Tellus Institute, and the World Resources Institute. It constitutes a state-of-the-art collection.

Healthcare Staff Scheduling Michael Mutingi, Charles Mbohwa, 2015-09-08. Healthcare operations in hospitals and home healthcare settings are inundated with complex fuzzy features that impose difficulties in the creation of work schedules. This book presents in-depth research on emerging approaches to healthcare staff scheduling. It starts by reviewing the key issues and challenges inherent in staff scheduling along with the basic concepts of fuzzy set theory. Examining cutting-edge research applications, it details fuzzy optimization algorithms derived from biologically inspired approaches and fuzzy theory. Facilitating a practical and in-depth understanding of modern fuzzy metaheuristic optimization approaches, the book presents recent research on multi-criteria algorithms and their applications in healthcare operations, particularly staff scheduling.
