addition to the instructions provided in this book you will need the following

### The Right Attitude

There will be those around you who may be unfamiliar with the process of earning money online and will try to devalue your efforts This isn't always malicious it's simply that we have been taught that the only way to make money is by going to a job and putting in hours for someone else We've been taught that real businesses are huge companies in huge buildings with staff and that the one person at his computer is probably only playing around You must not allow these naysayers to undermine your goals Your attitude is what will ultimately determine the extent of your success or failure As with losing weight earning a degree or raising a family you must be committed to the process and determined to see it succeed

### Patience

In addition to your attitude you will also need a little patience Because while you can send an email in 30 seconds it will take a little more time to reap the benefits of your online endeavors Many online business opportunities tout themselves as being able to send you from broke to rich in 30 days This simply is not true Now I can say that an online business can become profitable much faster than a brick and mortar business due to its minimal overhead you will still have to put in the time

### Ambition

Do you really want success This may seem like a dumb question but some people only think they want it Wanting to succeed is not enough you have to turn that desire into results If you set off on a journey it is almost always because you know where you're going and starting an online business is exactly the same You have to decide now what you want from this business Do you want to earn a full time income or do you only need to add a few dollars to the budget You must know what you want to achieve Starting your online business journey with a vague objective is like setting off from home with a vague idea that you would like to go somewhere If you don't know where you're going how are you ever going to know that you have arrived in the place you want to be For example if your initial objective is to reach a point where you are making 100 a month within the first six months of starting your business you have a clear objective You can then work backwards from that objective to list every step that you are going to have to take in order to achieve it The first thing you have to understand about starting an online business is exactly this it is a business Treat it like a hobby and you get what you deserve A business is by definition something that you should be serious about whereas a hobby or interest is fun or a diversion from everyday life This does not of course mean that a business cannot be fun as well because it can However if you don't treat your online moneymaking activities as a business you will never achieve the kind of success that I imagine you want

### Commitment

One of the biggest mistakes that many online marketing beginners make is to jump from one idea to another In terms of both your financial and your mental well being you simply cannot afford to keep jumping from one idea to the other always hoping to find the pot of gold at the end of the rainbow On the contrary what you must do is work a business plan and stick with it for a reasonable period of time until you have given it a genuine chance of achieving the success you are looking for It is imperative that you ignore all distractions and pay no attention whatsoever to the latest greatest product to come out because trust me from years of experience I have never seen a product which you genuinely cannot afford to be without It is also a fact that over the years I

have seen many online marketers make thousands of dollars with business plans or ideas that were actually not very good but they stuck with it through
