CG theory is its versatility in terms of the representation paradigms under which it falls. It can be viewed and therefore used under different representation paradigms which makes it a popular choice for a wealth of applications. Its full coupling with different cognitive processes lead to the opening of the field toward related research communities such as the Description Logic Formal Concept Analysis and Computational Linguistic communities. We now see more and more research results from one community enrich the other laying the foundations of common philosophical grounds from which a successful synergy can emerge.
