Processing Instruction and Discourse Alessandro G. Benati, James F. Lee, 2011-11-03 Processing Instruction is an approach to grammar instruction for second language learning contrasting with traditional grammar instruction in its focus on structured input rather than learners output This book compares student assessment after traditional grammar instruction and after Processing Instruction to assess the positive benefits of this method of second language teaching Rather than examining sentence level tasks the study looks at the relative effectiveness of Processing Instruction on discourse level linguistic ability Case studies using empirical data from second language learners of Japanese Italian and English are used to highlight the benefits to the learner of this method of enhanced input This monograph will be of interest to postgraduates and academics researching second language acquisition and applied linguistics **Processing Instruction and Discourse** Alessandro G. Benati, James F. Lee, 2010-01-04 Processing Instruction is an approach to grammar instruction for second language learning contrasting with traditional grammar instruction in its focus on structured input rather than learners output This book compares student assessment after traditional grammar instruction and after Processing Instruction to assess the positive benefits of this method of second language teaching Rather than examining sentence level tasks the study looks at the relative effectiveness of Processing Instruction on discourse level linguistic ability Case studies using empirical data from second language learners of Japanese Italian and English are used to highlight the benefits to the learner of this method of enhanced input This monograph will be of interest to postgraduates and academics researching second language acquisition and applied linguistics Research and Perspectives on Processing Instruction James F. Lee, Alessandro G. Benati, 2009 This volume tracks the impact Processing Instruction has made since its conception The authors explain Processing Instruction both its main theoretical underpinnings as well as the guidelines for developing structured input practices They review the empirical research conducted to date so that readers have an overview of new research carried out on the effects of Processing Instruction The work concludes with reflections on the generalizability and limits of the research on Processing Instruction and offers future directions for Processing Instruction research The Instruction and Acquisition of the BA Construction by Students of Chinese as a Foreign Language Hongying Xu, 2023-11-03 The Instruction and Acquisition of the BA Construction by Students of Chinese as a Foreign Language tackles the linguistically unique and notoriously difficult BA construction in Chinese covering its linguistic properties and acquisition by learners of Chinese as a foreign language alongside teaching recommendations Adopting the Interface Hypothesis and the Processing Instruction approach Hongying Xu argues that not all linguistic properties of the BA construction are equally difficult to acquire and that properties that call for knowledge from interfaces including semantics pragmatics and syntax are more difficult to master than those that involve pure syntactic knowledge Xu argues that instructors should provide manipulated input to help learners notice and process these properties before they are required to produce any grammatical and appropriate sentences

using the ba construction **Second Language Acquisition** Alessandro G. Benati, Tanja Angelovska, 2016-02-25 This book is written in order to help undergraduate students and trainee teachers to reflect on certain topics and key issues related to second language acquisition. Despite the proliferation of books and introductory courses in second language acquisition, most of these books very often provide a very complex account of theoretical views in second language acquisition and sometimes fail to emphasise the crucial interplay between how people learn languages and what is the most effective way to teach languages. The overall purpose of this book is to provide an overview of second language acquisition research and theories by identifying the main key issues in this field and by highlighting the relevance of this research for classroom implications. The study of second language acquisition is a rich and varied enterprise carried out by researchers whose interests and training often lie in broader disciplines of linguistics, psychology, sociology and education. Readers will be encouraged to critically reflect on the presented content through self-engaging thinking activities in the form of questions, matching activities, choices and conclusions about the implications of SLA theories to the real world applications.

Grammar Acquisition and Processing Instruction Alessandro Benati, James F. Lee, 2008-10-03 Research on Processing Instruction has so far investigated the primary effects of Processing Instruction. In this book, the results of a series of experimental studies investigating possible secondary and cumulative effects of Processing Instruction on the acquisition of French, Italian and English as a second language will be presented. The results of the three experiments have demonstrated that Processing Instruction not only provides learners the direct or primary benefit of learning to process and produce the morphological form on which they received instruction but also a secondary benefit in that they transferred that training to processing and producing another morphological form on which they had received no instruction.

Theory, Research and Pedagogy in Learning and Teaching Japanese Grammar Alessandro G. Benati, Sayoko Yamashita, 2016-10-19 This edited book focuses on the role of different types of pedagogical solutions in the acquisition of the Japanese grammatical system by reviewing, assessing and measuring current theory and research. Findings from this research have implications for the way Japanese grammar is learned and taught in a classroom context. The editors and contributors address a number of questions around the role of Japanese grammar learning and teaching such as: what is the role of instruction in Japanese second language acquisition? What are the main findings of empirical research into the acquisition of Japanese grammar? Is any one particular pedagogical intervention or solution to the teaching of Japanese grammar more effective than another? What pedagogical options do we have for the teaching of Japanese grammar? This book offers a unique insight into its practical implications for Japanese language learning and teaching for applied linguists, researchers, language teaching professionals and curriculum developers alike.

The Developmental Dimension in Instructed Second Language Learning Paul Malovrh, James F. Lee, 2013-03-28 This work identifies developmental stages in the acquisition of object pronouns by instructed second language learners of Spanish. It examines learners ranging from beginner to advanced, where the most advanced are

themselves teachers of Spanish language courses Study abroad experience is also a variable in the data The book explores language production from a functionalist perspective examining form to function and function to form mappings It provides insights into related developments in production placement and processing of object pronouns Detailed analysis reveals that the most powerful predictor of performance across levels and within levels for each of these is the level of the learner Formal instruction and the study abroad experience is examined both the specific instruction on object pronouns and overall exposure to instruction

Frequency Effects In Instructed Second Language Acquisition Karin Madlener, 2015-11-13 Based on a state of the art review of prior research in all related domains this book makes precise predictions about the expected effects of specific type and token frequency distributions in input floods and tests these in the second language classroom context *Native and Non-Native Teachers in English Language Classrooms* Juan de Dios Martinez Agudo, 2017-05-08 Despite being highly debated in applied linguistics and L2 teaching literature the controversial issue of non nativeness still remains unresolved Contemporary critical research has questioned the theoretical foundations of the nativeness paradigm which still exerts a strong influence in the language teaching profession Written by well known researchers and teacher educators from all over the world both NSs and NNSs the selected contributions of this volume cover a great variety of aspects related to the professional role and status of both NS and NNS teachers in terms of both perceived differences and professional concerns and challenges The strongest aspects of this volume are the global perspectives and the implications for future research and teacher education It is precisely this international perspective which makes this volume illustrative of different realities with a similar objective in mind the improvement of second language teaching and teacher education In today s world being a NS or NNS should not really matter but rather teachers professional competences This publication thus provides a forum of reflection and discussion for all L2 educators who need to be aware of how much they might offer to their future students
