*Interplay Between Chronic Pain and Affective-Cognitive Alterations: Shared Neural Mechanisms, Circuits, and Treatment* Luca Posa, Danilo De Gregorio, Serena Boccella, Kelly Smart, 2025-05-29 Pain is a multidimensional experience involving physical and negative emotional components Chronic pain clinically defined as lasting at least 3 months is a subjective perceptive experience involving affective and cognitive processing rather than a purely sensory phenomenon Patients suffering from persistent pain also experience negative emotions and decreased motivation Cognition is also required in the elaboration of the emotional component of pain and several cortical and limbic regions are involved in perception processing and pain modulation Some critical elements of cognition including memory and attention are unbalanced in patients suffering from chronic pain Nevertheless mood disorders including depression but also anxiety disorders show psychological comorbidity in chronic pain populations Over the last few years critical circuits and signaling pathways underlying the affective and cognitive component of pain emerged and novel targets have been identified for the development of treatment The scope of this research topic is to provide recent advances in the neural basis of emotional aspects of chronic pain The goal of this special issue is to collect research articles and reviews covering the last findings on the modulation of pain by cognitive and emotional states and on the mechanism by which chronic pain alters brain circuitry and ultimately to update the scientific and clinical community on recent findings in this field The research topic welcomes submissions from both academic and industry researchers All submissions should focus on the molecular mechanisms neuronal circuits and therapeutics targeting the mechanisms underlying the cognitive and or affective components in chronic pain conditions This article collection aims to include publications as original research and review articles on the following but not limited topics

- 1 Basic translational or clinical studies identifying the neurochemical basis at molecular cellular or circuit level of cognitive and emotional modulation of pain and or chronic pain effects on cognitive emotional circuitry
- 2 Preclinical or clinical original studies reviews in animals humans presenting data about pharmacological therapeutic targets to promote analgesic and

neuromodulator effects in cognitive and emotional deficits which are comorbid with chronic pain 3 Current status of novel translational approaches from animals to humans and vice versa exploring potential biomarkers involved in chronic pain and its emotional cognitive states      *Adoption as a Lifelong Process* Barbara Steck,2023-07-31 This book addresses the

psychosocial complexities of adoption from multiple perspectives including the biological family adopted child and adoptive parents It highlights the must have sensitivity and tactfulness for recurring discussions of the adoption situation Organized into 10 parts the book begins with a brief outline of the history of adoption and its legal status from antiquity to modern times Chapters in the first half of the book examine critical topics such as different parenthood situations stress and pain processes in early childhood and challenges of domestic international transcultural transracial foster and sexual and gender minorities adoption Within the second half of the book chapters describe the birth parents difficulties in relinquishing their infant the motives of the adoptive parents and the hardships of the adoptive children in self development The final chapters address the topic of deprivation traumatization and developmental trauma disorders on a psychodynamic level accompanied by clinical vignettes Unique perceptive and insightful Adoption A Life Long Process is an essential resource for all of those involved in the adoption process including counselors psychologists psychiatrists social workers adoptive parents and biological parents      *The Brain in Pain: A Multidimensional Approach* Carlo Adolfo Porro,Fausta Lui,Francesca

Benuzzi,Alexa Huber,2024-04-25      *Advances in Chronic and Neuropathic Pain* Jeimylo de Castro,Yasser El Miedany,2022-09-21 This book is an in depth guide to chronic and neuropathic pain The issue of chronic and neuropathic pain is very prevalent yet only a fraction of the symptoms and root causes as well as potential treatment plans are properly understood Additionally less than half of cases are accurately identified and properly treated The existing drugs although classified as very strong and powerful cannot provide lasting relief to chronic and neuropathic pain Thus with all the unique features of this condition this book presents a systematic way of diagnosing and approaching this condition so every practitioner can appropriately treat their patients In addition to introducing key concepts like classification of chronic pain and the challenges patients and practitioners face when dealing with and treating chronic and neuropathic pain this book also covers different syndromes that can lead to neuropathic pains It discusses how to monitor progress by using outcome measures the presence of chronic and neuropathic pain in children and young adults and the pathophysiology of neuropathic pain as it relates to the release of pro inflammatory cytokines Interestingly the latter is not presently addressed except with the usual pain drugs for general pain this book aims to revolutionize the approach to chronic and neuropathic pain by exploring it separately from the clinical approach to general pain It is interesting to note that these cytokines require a specific mode of action if we want to neutralize them in our system and this concept will be discussed in the regenerative intervention sections Since it is so necessary to address the many factors to chronic and neuropathic pain as laid out in the proposed table of contents it is also critical include as varied authors as possible to address this condition from all areas

being covered The team assembled to author the chapters included in this text come from diverse backgrounds of practice and clinical and research interests from physical medicine and rehabilitation to anesthesiology to radiology and interventional pain medicine This is an ideal guide for all clinicians caring for patients with chronic and neuropathic pain
