

Prodigy® P2

Electronic Brake Control

For 2, 4, 6 and 8 brake applications

READ THIS FIRST:

Read and follow all instructions carefully before installing or operating the Prodigy P2. Keep these instructions with the Brake Control for future reference.

Components of the Brake Control

- A. Power Knob
- B. Boost Button
- C. Manual Knob
- D. Connector (For Wiring Harness)
- E. Mounting Hole (1 per side)

Important Facts to Remember

1. Do not mount or activate RF generating items (cell phones, two way radios) near (less than 12") the brake control.
2. The Prodigy P2 employs an inertial sensor. It senses deceleration and generates an output that is based on deceleration, thus the term "Proportional Braking".
3. The Prodigy P2 will "HOLD" your trailer with 25% of power setting while you are at a standstill with brake pedal applied for longer than 5 seconds.
4. The Prodigy P2 will brake proportionally in reverse. It will apply the appropriate brake voltage based on deceleration.
5. For Technical Assistance and Warranty Information call: 1-888-785-5832 or www.tekonsha.com.
6. **⚠ WARNING** The Gross Combined Weight Rating (GCWR) must never exceed the vehicle manufacturer's recommendation.

Installation Guide

The Prodigy P2 can be mounted from 0 degrees to 360 degrees vertically in the direction of travel. (See Diagram for Mounting the Prodigy P2).

Failure to install the Prodigy P2 within these constraints may cause impaired performance.

Wiring Brake Control

Your Prodigy P2 brake control has a unique connector located at the back of the control. This connector allows you two options to wire your brake control.

Option 1:

Use Pigtail Wiring Harness included. This harness can be installed by following the Generic Wiring Guide.

Option 2:

Use a vehicle specific wiring harness. If your vehicle came with a factory tow package that included a 7-way connector, you can purchase a Tekonsha OEM wiring harness with the Prodigy P2 connector on one end and your specific vehicle's connector on the other.

Display Readings after Wiring the Prodigy P2

After successfully wiring your Prodigy P2 you should see the following on the two-digit display:

- Power to Prodigy P2 without trailer connected.
 Displays for 15 seconds then changes to: 
- Power to Prodigy P2 with trailer connected and Boost feature not engaged.  Boost feature engaged. 
- Manual Knob Activated without trailer

- Manual knob activated (with trailer), 5.4 denotes a hypothetical power output. This value is set using the power knob. Range is 0.0 to 13 volts. This is an indication of voltage output to electric brakes.

- Power to Prodigy P2 but display is in power saving mode (no motion or activity for at least fifteen minutes).
