Congratulations on your choice of a Nikon Laser IRT. Your new scope is the finest example of Nikon's rugged and durable construction and precision target optics, important qualities for a serious shooter's equipment.
Whether you use your scope for hunting or for target shooting, the procedure for mounting is identical. After mounting the scope in your rifle/scope, follow the procedure for scope adjustment.
When setting the scope for hunting, you should determine your standard range and then adjust the scope's target range for that distance. For target shooting, very fast, flat standard distance, you may simply adjust the position of the scope in relation to your target, or you may wish to use the scope's target range for target shooting. It's up to your personal preference.
We hope that you will enjoy your new Nikon Laser IRT for many years to come. Enjoy using it, and above all, always follow safe shooting procedures.
