The book proposes a balanced and effective food fortification strategy for nations to adopt. In covering the most technical scientific details in an approachable style, this work is accessible to a range of practitioners in industry, government, NGOs, academia, and research. Presents the latest science on fortification for the prevention of micronutrient deficiencies. Includes emerging areas such as biofortification, nutraceuticals, and new nutrient intake recommendations, standards, regulations, practices, and policies from around the world. Summarizes evidence of application of food fortification and measured impact on public health. Discusses how public policy impacts fortification of foods and nutritional deficiencies. Considers the complex economics of and market for fortified foods.
