The War for Europe and North Africa

BEFORE YOU READ

In the last section, you saw how the American involvement in World War II affected life on the home front.

In this section, you will see how the United States, Britain, and the Soviet Union combined to defeat Germany and its partners in Europe.

AS YOU READ

Take notes on the time line below. Fill it in with events that led to the defeat of Germany.

The United States and Britain Join Forces

(pages 569–570)

What were the goals of the American and British alliance?

In late December 1941, a few weeks after Pearl Harbor, President Roosevelt met with British Prime Minister Winston Churchill. They planned their war strategy. They agreed that the first thing to do was to defeat Hitler's Germany. Roosevelt and Churchill began a lasting friendship and a strong alliance between America and Britain.

After war was declared, German U-boats increased attacks on American ships in the Atlantic. Many American ships were sunk. The

Allies organized convoys, or groups, for shared protection. Warships and airplanes escorted the convoys. They used sonar and radar to find and destroy many German submarines.

The United States also started building ships at a rapid pace. Soon there were more Allied cargo ships, or Liberty ships, being made than being sunk. By mid-1943, the tide of the Battle of the Atlantic had turned in favor of the Allies.

1. What was the Battle of the Atlantic, and how did the Allies win it?

Crossroads and Cultures: A History of the World's Peoples incorporates the best current cultural history into a fresh and original narrative that connects global patterns of development with life on the ground. As the title Crossroads suggests, this new synthesis highlights the places and times where people exchanged goods and commodities, shared innovations and ideas, waged war and spread disease, and in doing so joined their lives to the broad sweep of global history. Students benefit from a strong pedagogical design, abundant maps and images, and special features that heighten the narrative's attention to the lives and voices of the world's peoples.

Imperial Subjects as Global Citizens Mark Lincicome, 2009-02-16

Lincicome offers a new perspective on Japanese educational debates and policy reforms that have taken place under the guise of internationalization since the mid 1980s. By contextualizing these developments within a historical framework spanning the entire twentieth century, he challenges the argument put forward by education officials, conservative politicians, and their supporters in the academy and the business world that history offers no guide for addressing the educational challenges that face contemporary Japan.

Combining diachronic and synchronic approaches, Lincicome analyzes repeated attempts throughout the twentieth century to internationalize education (kyoiku no kokusaika) in Japan. This comparison reveals important similarities that transcend educational policy to encompass Japanese conceptions of individual, national, and international identity, relations between the individual, the nation, the state, and the international community, and the type of education best suited to negotiating multiple identities among the next generation of Japanese subject citizens.

The Burning Answer Keith Barnham, 2014-05-15

Our civilisation stands on the brink of catastrophe. Our thirst for energy has led to threats from global warming, nuclear disaster, and conflict in oil-rich countries. We are running out of options. Solar power, Keith Barnham argues, is the answer. In this eye-opening book, he shows how a solar revolution is developing based on one of Einstein's lesser-known discoveries, one that gave us laptop computers and mobile phones. An accessible guide to renewable technology and a hard-hitting critique of the

arguments of solar sceptics The Burning Answer outlines a future in which the fuel for electric cars will be generated on our rooftops It is above all an impassioned call to arms to join the solar revolution before it s too late The Making of a Dialogical Theory Ivana Marková,2023-07-06 Creating a stimulating social theory with long lasting influence for generations of scholars is driven by multiple interacting factors The fortune of a theory is determined not only by the author s creative mind but also by the ways in which principal concepts are understood and interpreted The proper understanding of a social theory requires a good grasp of major historical political and cultural challenges that contribute to its making Considering these issues Markov explores Serge Moscovici s theory of social representations and communication as a case study in the making of a dialogical social theory She analyses both the undeveloped features and the forward moving inspirational highlights of the theory and presents them as a resource for linking issues and problems from diverse domains and disciplines This dialogical approach has the potential to advance the dyad Self Other as an irreducible intellectual ethical and aesthetic unit in epistemologies of the human and social sciences *Crossroads and Cultures, Volume B: 500-1750* Bonnie G.
