Making and Changing Law in Small Jurisdictions Caroline Morris, 2024-03-12 This book puts the spotlight on a different and neglected aspect of law drafting

and reform the question of size Specifically how does the size of a jurisdiction affect its ability to make and change its laws Some of the challenges affecting small jurisdictions include a lack of resources and paucity of policy drafting capacity the pressures and pull from sources outside the jurisdiction e g international bodies or NGOs larger states treaty commitments a vulnerability to domestic capture e g criminal elements big local businesses strong domestic lobby groups weak bad governance e g laws or institutions which themselves do not encourage or promote good governance reflection and reform the legacy of colonial legal systems and their interaction with indigenous or customary laws and struggles to comply with constitutional norms such as accountability and transparency Despite these difficulties small jurisdictions also have certain advantages when it comes to making and reforming law they can be flexible and creative they can legislate very quickly if the political will is there and there is strong informal formal accountability in a small jurisdiction This edited collection explores law reform and law drafting in small jurisdictions through the themes of sovereignty the impact of colonialism and legal plurality the challenges of harmonising laws at regional and international levels and constitutional reform Of use to researchers and practitioners alike

change uncertainty and offers a number of pathways that could be used to account for such uncertainties in the stated preference valuation research. It shows that uncertainty plays an important role in determining the values of climate change mitigation benefits and as the authors say, 'If this uncertainty remains unaccounted for, there is a potential danger that the estimated economic values will misrepresent social preferences for public policy interventions to manage environmental externalities.' *Valuing Climate Change Mitigation* discusses the role of uncertainty in valuing the benefits of climate change mitigation policies using contingent valuation and choice experiments techniques. It treats climate change using three dimensions of uncertainty: scenario, policy, and preference. Conceptual frameworks are advanced to account simultaneously for these various dimensions of uncertainty. The authors then explore the impact of introducing these uncertainties into benefit estimates for the Australian Carbon Pollution Reduction Scheme. The authors present frameworks to account for multiple uncertainty in environmental decision analysis that will prove invaluable for academics and students in the fields of environmental economics and management. Policy makers will also gain invaluable methodological insight.

Food and Nutrition Security in the Kingdom of Saudi Arabia, Vol. 2 Adam E. Ahmed, Jameel M. Al-Khayri, Azharia A. Elbushra, 2024-01-01

Food and nutrition security is a major concern for Saudi Arabia and the surrounding regions due to the range of challenges they face. These challenges include limited agricultural resources, low self-sufficiency in key food staples, climate change, and high levels of food loss and waste. This book aims to evaluate and analyze the current situation and future prospects of food and nutrition security in Saudi Arabia. Additionally, it seeks to analyze and assess the roles and functions of various institutions related to food security, providing a deeper understanding of the complex problems associated with it. Furthermore, this book aligns with Kingdom Vision 2030, which includes a set of strategies and programs focused on agriculture, food, and water security. It also aligns with the institutional identity of King Faisal University's Food Security and Environmental Sustainability. The book consists of four volumes. Volume 2 is entitled 'Macroeconomic Policy Implications on Food and Nutrition Security'. It covers various areas including food price, loss and waste, processing, finance, trade, investment, quality and safety, consumption patterns, climate change, early warning systems, nutrition, institutions, oil revenue, and the significance of date palm and Hassawi rice, genetically modified food, and edible insects in ensuring food and nutritional security. This book is highly significant for professionals, researchers, policymakers, and entrepreneurs involved in food and nutrition security in Saudi Arabia, the Gulf Cooperation Council, and various national and international organizations. It offers a comprehensive analysis of the obstacles and possibilities in ensuring food and nutrition security, as well as presenting practical approaches to address these issues. Additionally, graduate students studying in fields related to food and nutrition security will benefit from this book.

Foreign Investment, International Law and Common Concerns Tullio Treves, Francesco Seatzu, Seline Trevisanut, 2013-10-23

Increasingly transnational corporations, developed countries, and private actors are broadening the

boundaries of their investments into new territories in search of a higher return on capital. This growth in direct foreign investment involves serious concerns for both the investor and host state. Various exponents of international civil society and non-governmental organisations persuasively claim that such growth in foreign investments constitutes potential and serious hazards both to the environment and the fundamental rights and freedoms of local populations. This book explores from an international law perspective the complex relationship between foreign investments and common concerns, i.e. values that do not coincide or do not necessarily coincide with the interests of the investor and of the host state. It pays particular attention to the role of the main international development banks in reconciling the needs of foreign investors with the protection of common concerns such as the environment, human rights and labour rights. Among its collection of essays, the volume asks how much regulatory space investment law leaves, whether international investment law is an effective means of balancing contrasting interests, and whether investment arbitration currently constitutes a mechanism of global governance. In collecting the outlooks of various experts in human rights, environmental and international economic law, this book breaks new ground in exploring how attention to its legal aspects may help in navigating the relationship between foreign investment and common concerns. In doing so, the book provides valuable insights into the substantive issues and institutional aspects of international investment law.
