Office of Management and Budget, 2008 *Database Systems for Advanced Applications* Jeffrey Xu Yu, Myoung Ho Kim, Rainer Unland, 2011-04-09 This two volume set LNCS 6587 and LNCS 6588 constitutes the refereed proceedings of the 16th International Conference on Database Systems for Advanced Applications DASFAA 2011 held in Saarbrücken Germany in April 2010 The 53 revised full papers and 12 revised short papers presented together with 2 invited keynote papers 22 demonstration papers 4 industrial papers 8 demo papers and the abstract of 1 panel discussion were carefully reviewed and selected from a total of 225 submissions The topics covered are social network social network and privacy data mining probability and uncertainty stream processing graph XML XML and graph similarity searching and digital preservation spatial queries query processing as well as indexing and high performance *Computability, Complexity, Logic* E. Börger, 1989-07-01 The theme of this book is formed by a pair of concepts the concept of formal language as carrier of the precise expression of meaning facts and problems and the concept of algorithm or calculus i.e. a formally operating procedure for the solution of precisely described questions and problems The book is a unified introduction to the modern theory of these concepts to the way in which they developed first in mathematical logic and computability theory and later in automata theory and to the theory of formal languages and complexity theory Apart from considering the fundamental themes and classical aspects of these areas the subject matter has been selected to give priority throughout to the new aspects of traditional questions results and methods which have developed from the needs or knowledge of computer science and particularly of complexity theory It is both a textbook for introductory courses in the above mentioned disciplines as well as a monograph in which further results of new research are systematically presented and where an attempt is made to make explicit the connections and analogies between a variety of concepts and constructions **Handbook of Pseudo-Riemannian Geometry and Supersymmetry** Vicente Cortés, 2010 The purpose of this handbook is to give an overview of some recent developments in differential geometry related to supersymmetric field theories The main themes covered are Special geometry and supersymmetry Generalized geometry Geometries with torsion Para geometries Holonomy theory Symmetric spaces and spaces of constant curvature Conformal geometry Wave equations on Lorentzian manifolds D branes and K theory The intended audience consists of advanced students and researchers working in differential geometry string theory and related areas The emphasis is on geometrical structures occurring on target spaces of supersymmetric field theories Some of these structures can be fully described in the

classical framework of pseudo Riemannian geometry Others lead to new concepts relating various fields of research such as special Kahler geometry or generalized geometry

Mathematical Methods in Engineering Joseph M. Powers, Mihir Sen, 2015-01-26 This text focuses on a variety of topics in mathematics in common usage in graduate engineering programs including vector calculus linear and nonlinear ordinary differential equations approximation methods vector spaces linear algebra integral equations and dynamical systems The book is designed for engineering graduate students who wonder how much of their basic mathematics will be of use in practice Following development of the underlying analysis the book takes students through a large number of examples that have been worked in detail Students can choose to go through each step or to skip ahead if they so desire After seeing all the intermediate steps they will be in a better position to know what is expected of them when solving assignments examination problems and when on the job Chapters conclude with exercises for the student that reinforce the chapter content and help connect the subject matter to a variety of engineering problems Students have grown up with computer based tools including numerical calculations and computer graphics the worked out examples as well as the end of chapter exercises often use computers for numerical and symbolic computations and for graphical display of the results

America's Disaster Culture Robert C. Bell, Robert M. Ficociello, 2017-10-19 Are we inside the era of disasters or are we merely inundated by mediated accounts of events categorized as catastrophic America's Disaster Culture offers answers to this question and a critical theory surrounding the culture of natural disasters in American consumerism literature media film and popular culture In a hyper mediated global culture disaster events reach us with great speed and minute detail and Americans begin forming

interpreting and historicizing catastrophes simultaneously with fellow citizens and people worldwide America's Disaster Culture is not policy management or relief oriented It offers an analytical framework for the cultural production and representation of disasters catastrophes and apocalypses in American culture It focuses on filling a need for critical analysis centered upon the omnipresence of real and imagined disasters epidemics and apocalypses in American culture However it also observes events such as the Dust Bowl Hurricane Katrina and 9 11 that are re framed and re historicized as natural disasters by contemporary media and pop culture Therefore America's Disaster Culture theorizes the very parameters of classifying any event as a natural disaster addresses the biases involved in a catastrophic event's public narrative and analyzes American culture's consumption of a disastrous event Looking toward the future what are the hypothetical and actual threats to disaster culture Or are we oblivious that we are currently living in a post apocalyptic landscape
