At Translation's Edge Nataša Durovicova, Patrice Petro, Lorena Terando, 2019-06-14 Since the 1970s the field of Translation Studies has entered into dialogue with an array of other disciplines sustaining a close but contentious relationship with literary translation At Translation s Edge expands this interdisciplinary dialogue by taking up questions of translation across sub fields and within disciplines including film and media studies comparative literature history and education among others For the contributors to this volume translation is understood in its most expansive transdisciplinary sense translation as exchange migration and mobility including cross cultural communication and media circulation Whether exploring the Universal Declaration of Human Rights or silent film intertitles this volume brings together the work of scholars aiming to address the edges of Translation Studies while engaging with major and minor languages colonial and post colonial studies feminism and disability studies and theories of globalization and empire Bible Society Record ,1914

Anthropological Papers of the American Museum of Natural History American Museum of Natural History, 1914 **The Bellman** ,1915 Merchants Trade Journal ,1914 Edge Detection Methods Based on Generalized Type-2 Fuzzy Logic Claudia I. Gonzalez, Patricia Melin, Juan R. Castro, Oscar Castillo, 2017-03-05 In this book four new methods are proposed In the first method the generalized type 2 fuzzy logic is combined with the morphological gradient technique The second method combines the general type 2 fuzzy systems GT2 FSs and the Sobel operator in the third approach the methodology based on Sobel operator and GT2 FSs is improved to be applied on color images In the fourth approach we proposed a novel edge detection method where a digital image is converted a generalized type 2 fuzzy image In this book it is also included a comparative study of type 1 interval type 2 and generalized type 2 fuzzy systems as tools to enhance edge detection in digital images when used in conjunction with the morphological gradient and the Sobel operator The proposed generalized type 2 fuzzy edge detection methods were tested with benchmark images and synthetic images in a grayscale and color format Another contribution in this book is that the generalized type 2 fuzzy edge detector method is applied in the preprocessing phase of a face recognition system where the recognition system is based on a monolithic neural network The aim of this part of the book is to show the advantage of using a generalized type 2 fuzzy edge detector in pattern recognition applications The main goal of using generalized type 2 fuzzy logic in edge detection applications is to provide them with the ability to handle uncertainty in processing real world images otherwise to demonstrate that a GT2 FS has a better performance than the edge detection methods based on type 1 and type 2 fuzzy logic systems **Philippine Education Magazine** ,1906 **Machine Learning and Knowledge Discovery in Databases: Research Track** Danai Koutra, Claudia Plant, Manuel Gomez Rodriguez, Elena Baralis, Francesco Bonchi, 2023-09-16 The multi volume set LNAI 14169 until 14175 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases ECML PKDD 2023 which took place in Turin Italy in September 2023 The 196 papers were selected from the 829
