The result is smarter assessment for both teachers and students Future of STEM education: Multiple perspectives from researchers Subramaniam Ramanathan, Ida Ah Chee Mok, 2023-03-28 **The State of the System** Paul W. Bennett, 2020-09-23

Over the last fifty years Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage. Crying out for democratic school level reform, the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents, further out of touch with communities and surprisingly unresponsive to classroom teachers. Exploring the nature of the Canadian education order in all its dimensions, *The State of the System* explains how public schools came to be so bureaucratic, confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces, and addresses the need for systemic reform. Going beyond a diagnosis of the stresses, strains, and ills present in the system, Paul Bennett proposes a bold plan to re-engineer schools on a more human scale as the first step in truly reforming public education. In place of school consolidation and managerialism, one size fits all uniformity, limited school choice, and the success for all curriculum, Bennett advocates for a new set of priorities: decentralize school governance, deprogram education ministries and school districts, listen to parents and teachers, and revitalize local education democracy. Tackling the thorny issues besetting contemporary school systems in Canada, *The State of the System* issues a clarion call for more responsive, engaged, and accountable public schools. *Designing and Teaching Fitness Education Courses* Jayne Debra Greenberg, Nichole D. Calkins, Lisa S. Spinosa, 2022

Helps physical educators develop and implement fitness education courses in their curricula. Includes pacing guides which act as a teacher's blueprint throughout a semester and offers 139 video clips and 211 instructional photos that show the activities, all of which require no equipment. **Va/Dod Clinical Practice Guideline: Management of Posttraumatic Stress Disorder and Acute Stress Disorder Guideline Summary** Veterans Health Administration Chief Bus, Veterans Affairs Dept (U S), 2017-05. This updated guidance covers treatment for both PTSD (Post Traumatic Stress Disorder) and Acute Stress Disorder (ASD) from the clinical perspective. This clinical practice guideline is objective evidence-based information on the management of PTSD and related conditions. It is intended to provide healthcare providers with assistance in all aspects of patient care, including but not limited to diagnosis, treatment, and follow-up. Within this guideline, it defines traumatic events and stress disorders as defined in the Diagnostic and Statistical Manual of Mental Health Disorders, Fifth Edition, that will appeal to military combat situations found in war zones or events of serious injury or threatened death. Acute stress disorder often involves symptoms that last at least three days but less than one month after exposure to a traumatic event for an individual to be eligible for the diagnosis.
