Resource Guide Multiple Intelligences:

Teaching and Learning Through Multiple Intelligences Linda Campbell, Bruce Campbell, Dee Dickinson, 2004
Teaching and Learning Through Multiple Intelligences is an outstanding resource that offers expert analysis of Gardner's Theory of Multiple Intelligences and the knowledge to extend this theory to effective classroom practice. Broad based and comprehensive, this text describes implications for pedagogy, team teaching, student strengths, curriculum, assessment, community involvement, and diverse classroom models. The authors devote one chapter to each of the eight intelligences. They define intelligence, provide a checklist for identifying it, suggest environmental considerations, and offer related teaching strategies. Additional chapters survey Gardner's recent work on teaching for understanding, performance based assessment, and model MI school programs and student outcomes.

Multiple Intelligences in the Classroom Elizabeth Morris, 2005
The resource outlines the 8 multiple intelligences. It has sections on how to recognise the strengths children have through their different responses in the classroom or in small groups. It is full of ideas for teachers, parents, and children on how to enjoy and develop these intelligences to the full. This resource will help schools support workers and families to work together to support their children in their learning journey by providing a holistic way of understanding and celebrating all of a child's intelligences.
