customizing evolutionary methods to the on line nature of reinforcement learning and using them to evolve representations for value function approximators The second approach automatically learns representations based on piecewise constant approximations of value functions It begins with coarse representations and gradually refines them during learning analyzing the current policy and value function to deduce the best refinements This book also introduces a novel method for devising input representations This method addresses the feature selection problem by extending an algorithm that evolves the topology and weights of neural networks such that it evolves their inputs too In addition to introducing these new methods this book presents extensive empirical results in multiple domains demonstrating that these techniques can substantially improve performance over methods with manual representations *Chicago Tribune Index* ,2000 *On the "Human" in Human-Artificial Intelligence Interaction* Stefano Triberti,Davide La Torre,Jianyi Lin,Ilaria Durosini,Manuel Ruiz Galan,2022-02-10 *American Motorcyclist* ,2003-03 American Motorcyclist magazine the official journal of the American Motorcyclist Associaton tells the stories of the people who make motorcycling the sport that it is It s available monthly to AMA members Become a part of the largest most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800 AMA JOIN **Forthcoming Books** Rose Arny,2003 *Evolution of Nervous Systems* Georg F.
