Validity of Educational Assessments in Chile and Latin America Jorge Manzi,María Rosa

García,Sandy Taut,2021-09-11 This edited volume presents a systematic analysis of conceptual methodological and applied aspects related to the validation of educational tests used in Latin American countries Inspired by international standards on educational measurement and evaluation this book illustrates efforts that have been made in several countries to validate different types of educational assessments including student learning assessments measurements of non cognitive aspects in students teacher evaluations and tests for certification and selection It gathers the experience of validity studies from the main international assessments in Latin America PISA TIMSS ERCE and ICCS Additionally it shows the challenges that must be taken into account when evaluations are used to compare countries groups or trends of achievement over time The book builds on the premise that measurements in the educational field should not be used if there are no studies that support the validity of the interpretation of their scores or the use made of such tests It shows that despite the recognition given to validity relatively few educational measurement assessments have accumulated enough evidence to support their interpretation and use In doing so this volume increases awareness about the relevance of validity especially when assessments are key component of educational policies

Using Data to Improve Schools Elaine Allensworth, 2025-11-04 Make data work for your school and for every student Far too often educators are inundated with data that feels overwhelming irrelevant or unhelpful In *Using Data to Improve Schools* nationally recognized expert on school transformation and student achievement Elaine Allensworth offers a framework for understanding the critical properties of data and the tools educators need to focus on the metrics that matter most for student achievement Rooted in two decades of research on educational policy and practice and real world success stories from Chicago Public Schools this groundbreaking guide bridges the gap between theory and practice helping educators build a culture of data driven collaboration and success Topics covered include Common myths and assumptions that divert attention from the data that matter most Guidance on using systems for continuous improvement such as Early Warning Indicator EWI and Multi Tiered Systems of Support MTSS Tools to align teachers families and staff around a shared vision and strategies that build trust and momentum for sustainable growth Allensworth clearly outlines how schools can improve key performance areas like attendance test scores and graduation rates by identifying high impact metrics and fostering a collaborative culture of improvement By simplifying complex concepts and offering tools for effective collaboration this guide inspires educators to turn numbers into positive change

The Great Debate Harrison J. Kell, Jonas Lang, 2019-07-26 There are many different theories of intelligence Although these theories differ in their nuances nearly all agree that there are multiple cognitive abilities and that they differ in the breadth of content they are typically associated with There is much less agreement about the relative importance of cognitive abilities of differing generality for predicting important real world outcomes such as educational achievement career success job performance and health Some investigators believe that narrower abilities hold little predictive power once general abilities have been accounted for Other investigators contend that specific abilities are often as or even more effective in forecasting many practical variables as general abilities These disagreements often turn on differences of theory and methodology that are both subtle and complex The five cutting edge contributions in this volume both empirical and theoretical advance the conversation in this vigorous and highly important scientific debate

Extending Intelligence Patrick C. Kyllonen, Richard D. Roberts, Lazar Stankov, 2008 This volume presents research from a variety of perspectives on the enhancement of human intelligence It is organized around five themes enhancement via instruction enhancement via development over the life cycle enhancement over time enhancement via new constructs and new directions in enhancement Three key issues are addressed First although most of the scientific research on intelligence has concerned what it is this volume attends to the consequential societal and economic issue concerns of whether it can be increased and how Second intellectual enhancement is particularly important when targeted to minorities and the poor groups that have typically performed relatively less well on intelligence and achievement measures This volume reflects the education community's ongoing interest in understanding and attempting to

close achievement or test score gaps Third most of the attention to examining intellectual enhancement and in accounting for and closing the test score gap has focused on general cognitive ability In line with the current emphasis on considering intelligence from a wider perspective this volume includes constructs such as emotional and practical intelligence in definitions of intellectual functioning Extending Intelligence Enhancement and New Constructs is an essential volume for researchers students and professionals in the fields of educational psychology intelligence educational measurement and assessment and critical thinking
