Proving That a Quadrilateral Is a Parallelogram

Algebra For what values of x and y must $ABCD$ be a parallelogram?

To start, write an equation that relates the lengths of opposite sides that have algebraic expressions with the same variable.

$$3x - 5 = \underline{?} \quad \mathbf{2x + 2}$$

Can you prove the quadrilateral is a parallelogram based on the given information? Explain.

10. **Reasoning** A classmate drew a quadrilateral with two diagonals. This divided the figure into four isosceles triangles. Is the quadrilateral a parallelogram? Use a drawing to justify your answer.
- Yes; since all the sections of the diagonals are congruent, the diagonals bisect each other and the figure is a parallelogram.**
