Neural Information Processing Tom Gedeon, Kok Wai Wong, Minho Lee, 2019-12-05 The two volume set CCIS 1142 and 1143 constitutes thoroughly refereed contributions presented at the 26th International Conference on Neural Information Processing ICONIP 2019 held in Sydney Australia in December 2019 For ICONIP 2019 a total of 345 papers was carefully reviewed and selected for publication out of 645 submissions The 168 papers included in this volume set were organized in topical sections as follows adversarial networks and learning convolutional neural networks deep neural networks embeddings and feature fusion human centred computing human centred computing and medicine human centred computing for emotion hybrid models image processing by neural techniques learning from incomplete data model compression and optimization neural network applications neural network models semantic and graph based approaches social network computing spiking neuron and related models text computing using neural techniques time series and related models and unsupervised neural models

Advances in Big Data Analytics Yong Shi, 2022-01-13 Today big data affects countless aspects of our daily lives This book provides a comprehensive and cutting edge study on big data analytics based on the research findings and applications developed by the author and his colleagues in related areas It addresses the concepts of big data analytics and or data science multi criteria optimization for learning expert and rule based data analysis support vector machines for classification feature selection data stream analysis learning analysis sentiment analysis link analysis and evaluation analysis The book also explores lessons learned in applying big data to business engineering and healthcare Lastly it addresses the advanced topic of intelligence quotient IQ tests for artificial intelligence divSince each aspect mentioned above concerns a specific domain of application taken together the algorithms procedures analysis and empirical studies presented here offer a general picture of big data developments Accordingly the book can not only serve as a textbook for graduates with a fundamental grasp of training in big data analytics but can also show practitioners how to use the proposed techniques to deal with real world big data problems

RealWorld Evaluation Michael Bamberger, Jim Rugh, Linda Mabry, 2011-11-29 This book addresses the challenges of conducting program evaluations in real world contexts where evaluators and the agencies face budget and time constraints and where critical data is missing The book is organized around a seven step model developed by the authors which has been tested and refined in workshops Vignettes and case studies representing evaluations from a variety of geographic regions and sectors demonstrate adaptive possibilities for small projects with budgets of a few thousand dollars to large scale long term evaluations The text incorporates quantitative qualitative and mixed method designs and this Second Edition reflects important developments in the field over the last five years

Smart and Secure Embedded and Mobile Systems Jorge Marx Gómez, Anael Elikana Sam, Devotha Godfrey Nyambo, 2024-06-29 This book gathers a selection of research papers that delve into the field of smart systems covering a wide range of applications in transportation agriculture healthcare energy management and more Emphasizing the fusion of

intelligence and security they reveal how advanced embedded and mobile systems are paving the way for a smarter and safer future The book presents peer reviewed research articles from the First International Conference on Embedded and Mobile Systems ICTA EMOS which was held on November 24th 25th 2022 in Arusha Tanzania The book showcases the remarkable potential of advanced technologies in shaping a smarter and more secure world addressing topics such as transportation and mobility solutions smart manufacturing and agriculture ICT infrastructure and resource management healthcare and energy management system integration and control and solutions for innovation and monitoring **The Pattern Paradigm** Bruce S C Robertson,2012-07-24 Have you ever wondered how we know what we know The Pattern Paradigm looks beneath the surface of what passes for truth and presents a new way of understanding It tells the story of how knowledge is achieved starting from the basics and progressing to the pyramid of patterns which lie at the heart of thinking It describes how the pattern paradigm is superior to the status quo paradigm that pervades much of philosophy today It is able to do this because it is a paradigm of great simplicity and great power It opens up a new and more accurate way of understanding It provides the missing link between sense data and knowledge It provides new insights into old problems which are not only amazing but also robust and self consistent It is a book for both keen philosophers and for anyone else interested in philosophy as it is easy to read and written in layman s terms If you only ever read one book on philosophy make it this one This is a work of genius J E Shearer **Computer Vision - ECCV 2024** Aleš Leonardis,Elisa Ricci,Stefan Roth,Olga Russakovsky,Torsten Sattler,Gül Varol,2024-12-06 The multi volume set of LNCS books with volume numbers 15059 upto 15147 constitutes the refereed proceedings of the 18th European Conference on Computer Vision ECCV 2024 held in Milan Italy during September 29 October 4 2024 The 2387 papers presented in these proceedings were carefully reviewed and selected from a total of 8585 submissions They deal with topics such as Computer vision Machine learning Deep neural networks Reinforcement learning Object recognition Image classification Image processing Object detection Semantic segmentation Human pose estimation 3D reconstruction Stereo vision Computational photography Neural networks Image coding Image reconstruction and Motion estimation *Battle of the Immortal* Jeff Norton,2013-05-02 Hordes of Uploaded the online incarnations of dead people have escaped the Metasphere and taken over the bodies of living people in the real world As warring factions vie for control of the online sphere computer viruses and rocket technology are among the weapons used in a savage battle between the living and the dead Jonah faces an ever more complicated future and must make a terrible choice about his own Uploaded father *Advances in Network Complexity* Matthias Dehmer,Abbe Mowshowitz,Frank Emmert-Streib,2013-06-21 A well balanced overview of mathematical approaches to complex systems ranging from applications in chemistry and ecology to basic research questions on network complexity Matthias Dehmer Abbe Mowshowitz and Frank Emmert Streib well known pioneers in the fi eld have edited this volume with a view to balancing classical and modern approaches to ensure broad coverage of contemporary research problems The book is a valuable addition to the literature and a must have for

anyone dealing with network complexity and complexity issues

Fundamental Problems in Quantum Physics M.

Ferrero, Alwyn van der Merwe, 2013-06-29 For many physicists quantum theory contains strong conceptual difficulties while for others the apparent conclusions about the reality of our physical world and the ways in which we discover that reality remain philosophically unacceptable This book focuses on recent theoretical and experimental developments in the foundations of quantum physics including topics such as the puzzles and paradoxes which appear when general relativity and quantum mechanics are combined the emergence of classical properties from quantum mechanics stochastic electrodynamics EPR experiments and Bell's Theorem the consistent histories approach and the problem of datum uniqueness in quantum mechanics non local measurements and teleportation of quantum states quantum non demolition measurements in optics and matter wave properties observed by neutron electron and atomic interferometry Audience This volume is intended for graduate students of physics and those interested in the foundations of quantum theory

Virtual Justice Greg Lastowka, 2010-10-26 Tens of millions of people today are living part of their life in a virtual world In places like World of Warcraft Second Life and Free Realms people are making friends building communities creating art and making real money Business is booming on the virtual frontier as billions of dollars are paid in exchange for pixels on screens But sometimes things go wrong Virtual criminals defraud online communities in pursuit of real world profits People feel cheated when their avatars lose virtual property to wrongdoers Increasingly they turn to legal systems for solutions But when your avatar has been robbed what law is there to assist you In *Virtual Justice* Greg Lastowka illustrates the real legal dilemmas posed by virtual worlds Presenting the most recent lawsuits and controversies he explains how governments are responding to the chaos on the cyberspace frontier After an engaging overview of the history and business models of today's virtual worlds he explores how laws of property jurisdiction crime and copyright are being adapted to pave the path of virtual law Virtual worlds are becoming more important to society with each passing year This pioneering study will be an invaluable guide to scholars of online communities for years to come

Digital Geometry in Image Processing Jayanta Mukhopadhyay, Partha Pratim Das, Samiran Chattopadhyay, Partha Bhowmick, Biswa Nath Chatterji, 2016-04-19 Exploring theories and applications developed during the last 30 years Digital Geometry in Image Processing presents a mathematical treatment of the properties of digital metric spaces and their relevance in analyzing shapes in two and three dimensions Unlike similar books this one connects the two areas of image processing and digital geometry highlighting important results of digital geometry that are currently used in image analysis

and processing The book discusses different digital geometries in multi dimensional integral coordinate spaces It also describes interesting properties of the geometries including metric and topological properties shapes of circles and spheres proximity to Euclidean norms and number theoretic representations of geometric objects such as straight lines and circles The authors all active researchers in image processing and digital geometry demonstrate how these concepts and properties are useful in various techniques for image processing and analysis In particular the book covers applications in object representation and shape analysis With many figures some in color and end of chapter exercises this book provides an in depth unified account of digital metrics the characterization of digital curves and straight lines and their uses in shape analysis It gives you insight on the latest two and three dimensional image processing applications **The Philosophy of**

Religion Edward R. Wierenga, 2016-07-29 Philosophy of Religion is an engaging introduction to the main tenets of this fascinating subject written clearly and with detailed enough explanation to be accessible to those new to the field whilst providing original and challenging ideas to more experienced students The ideal introduction to this fascinating subject providing a clear and engaging entry point to the field The book lucidly introduces the main issues in philosophy of religion and develops a rigorous yet accessible approach to evaluating positions on these issues No previous exposure to philosophy is assumed and more technical topics are introduced and explained before they are employed Original ideas and new approaches to concepts within the book ensure that it is also relevant to those already familiar with the subject *Complex Networks & Their Applications XII* Hocine Cherifi, Luis M. Rocha, Chantal Cherifi, Murat Donduran, 2024-02-28 This book highlights cutting edge research in the field of network science offering scientists researchers students and practitioners a unique update on the latest advances in theory and a multitude of applications It presents the peer reviewed proceedings of the XII International Conference on Complex Networks and their Applications COMPLEX NETWORKS 2023 The carefully selected papers cover a wide range of theoretical topics such as network embedding and network geometry community structure network dynamics diffusion epidemics and spreading processes machine learning and graph neural networks as well as all the main network applications including social and political networks networks in finance and economics biological networks and technological networks Multimedia 2001 J.A. Jorge, N.M. Correia, H. Jones, M.B. Kamegai, 2012-12-06 This book presents the results of EG Multimedia 2001 the Sixth Eurographics th th Workshop on Multimedia held in Manchester UK on the 8 and 9 of September 2001 All six such workshops are successful examples of fruitful international cooperation under the auspices of the Eurographics working group on Multimedia The workshop covered a wide range of subjects from media production to content processing and delivery with a special focus on issues related to interactive video environments These Dcluded standards and approaches for interactive television hypervideo collaborative video augmented reality mobile multimedia the integration of TV and the Web content analysis processing and presentation The program consisted of two invited keynote presentations eighteen technical papers and one demonstration attracting a diverse world wide group of

thirty attendees Technical papers were organized in six sessions spanning the two days 3D in Multimedia Architectures and Authoring ideo and Coding Content Based Retrieval and Security Interactive Media and Interactive TV The demonstration presented a multimedia system for aerobics and fitness training exploring the combination of sound and interactive graphics in an effective manner The keynote presentation by V Michael Bove provided insights into new architectures for large scale pervasive computing The second invited presentation by Glorianna Davenport discussed the relations between creativity and interactive movies as participatory art enabled by new media

Human-Centered Software Engineering Ahmed Seffah, Jean Vanderdonckt, Michel C. Desmarais, 2009-06-19 Activity theory is a way of describing and characterizing the structure of human activity of all kinds First introduced by Russian psychologists Rubinshtein Leontiev and Vigotsky in the early part of the last century activity theory has more recently gained increasing attention among interaction designers and others in the human computer interaction and usability communities see for example Gay and H Brooke 2004 Interest was given a significant boost when Donald Norman suggested activity theory and activity centered design as antidotes to some of the putative ills of human centered design Norman 2005 Norman who has been credited with coining the phrase user centered design suggested that too much attention focused on human users may be harmful that to design better tools designers need to focus not so much on users as on the activities in which users are engaged and the tasks they seek to perform within those activities Although many researchers and practitioners claim to have used or been influenced by activity theory in their work see for example Nardi 1996 it is often difficult to trace precisely where or how the results have actually been shaped by activity theory In many cases even detailed case studies report results that seem only distantly related if at all to the use of activity theory Contributing to the lack of precise and traceable impact is that activity theory spite its name is not truly a formal and proper theory

Formal Methods in Systems Engineering Peter Ryan, Chris Sennett, 2012-12-06 As computer technology is used to control critical systems to an increasing degree it is vital that the methods for developing and understanding these systems are substantially improved The mathematical and scientific foundations currently used are extremely limited which means that their correctness and reliability cannot be ensured to an acceptable level Systems engineering needs to become a fully fledged scientific discipline and formal methods which are characterised by their firm

mathematical foundations are playing a vital role in achieving this transition This volume is based on the proceedings of the Formal Methods Workshop FM91 held in Drymen Scotland 24 27 September 1991 This was the second workshop sponsored by the Canadian and US governments to address the role of formal methods in the development of digital systems Traditionally formal methods have evolved in isolation from more conventional approaches and one of the aims of this workshop was to emphasise the benefits of integrating the two areas The workshop concentrated on the themes of quality assurance design methods and mathematical modelling techniques Particular emphasis was given to safety and security applications Among the topics covered in this volume are what is a formal method social research on formal methods current quality assurance methods and formal methods a pragmatic approach to validation integrating methods in practice composition of descriptions and topics in large program formal development Formal Methods in Systems Engineering provides an overview of many of the major approaches to formal methods and the benefits which can result from them It is relevant to academic and industrial researchers industrial practitioners and government workers with an interest in certification
