Technology-Enabled Blended Learning Experiences for Chemistry Education and Outreach Fun Man Fung, Christoph Zimmermann, 2021-07-03

Technology Enabled Blended Learning Experiences for Chemistry Education and Outreach discusses new technologies and their potential for the advancement of chemistry education particularly in topics that are difficult to demonstrate in traditional 2d media

The book covers the theoretical background of technologies currently in use such as virtual and augmented reality introducing readers to the current landscape and providing a solid foundation on how technology can be usefully integrated in both learning and teaching chemistry content

Other sections cover the implementation of technology how to design a curriculum and how new tactics can be applied to both outreach and evaluation efforts

Case studies supplement the information presented providing the reader with practicable examples and applications of covered theories and technologies

Drawing on the broad experiences and unique insights of a global team of authors from a whole host of different backgrounds the book aims to stimulate readers creativity and inspire them to find their own novel applications of the techniques highlighted in this volume

Provides detailed information on the theoretical background of technology usage in chemistry education including discussions of augmented and virtual reality

Helps readers understand available options and make informed decisions on how to best utilize technology to enhance their chemistry teaching using concepts surrounding blended learning

Presents examples of theory in practice through case studies that detail completed implementations from around the world
