Guidance for quality assurance project plans , Equipment Management in the Post-Maintenance Era Kern Peng,2021-11-08 Recent advancements in information systems and computer technology have led to developments in equipment and robotic technology that have permanently changed the characteristics of manufacturing equipment Equipment Management in the Post Maintenance Era Advancing in the Era of Smart Machines introduces a new way of thinking to help high tech organizations manage an increasingly complex equipment base It also facilitates the fundamental understanding of equipment management those in traditional industries will need to prepare for the emerging microchip era in equipment Kern Peng shares insights gained through decades of managing equipment performance Using a systems model to analyze equipment management he introduces alternatives in equipment management that are currently gaining momentum in high tech industries The book highlights the fundamental internal flaw in maintenance organizational setup presents new approaches to replace maintenance functional setup and illustrates a time tested transformation and implementation process to help transition your organization from the maintenance era to the new post maintenance era Fundamentally it Breaks down the history of equipment into five phases Provides a clear understanding of equipment management fundamentals and Introduces alternatives in equipment management beyond the mainstream principles of maintenance management More specifically the book examines maintenance management logistics including planning and budgeting training and people development customer services and management vendor management and

inventory management Supplying a comprehensive look at the history of equipment management it analyzes current maintenance practice and details approaches that can significantly improve the effectiveness and efficiency of your equipment management well into the future This second edition addresses the role of the development of the Internet of Things IoT and significant advancements in artificial intelligence AI and machine learning ML in enabling a new generation of smart machines which have in turn laid the foundation for Industry 4 0 Equipment utilizing IoT and sensors can monitor components and allow them to be serviced at an exact time without the need for a preventive maintenance schedule Moreover equipment replacement rarely occurs at the end of the piece of equipment s natural life rather replacement is driven by the introduction of new technologies and products all of which lead to less maintenance activities and reduces the importance of the traditional maintenance function Maintenance departments today operate with fewer employees and smaller budgets At a point when machines are smart enough to keep themselves running or equipment is rendered obsolete by better equipment in a short time such as with computers and cellphones companies do not need a maintenance department This updated edition reiterates the importance of transitioning to the post maintenance era to effectively manage today s sophisticated smart yet expensive equipment Many changes the author predicted a decade ago are accelerating in the IoT era Equipment management is moving further away from the maintenance era and advancing deeper into the post maintenance era The trend for smart machines is very clear and companies that do not upgrade their equipment will lose their competitiveness As equipment and factories become smarter companies must change their practices and organizational structures to manage the new generation of equipment for Industry 4 0

Air Force Journal of Logistics ,2003 **Library Technology Planning for Today and Tomorrow**
Diana Silveira, 2018-10-15 Technology is a crucial part of libraries today But when it comes to figuring out the most effective technologies for their library or to planning for future technology needs many librarians don t know where to begin Library Technology Planning for Today and Tomorrow is the place to start This practical guide will be of special value to those in small and medium size libraries especially those new to the planning process who have not previously implemented technology or who have had difficulty implementing strategic plans By using this LITA guide overwhelmed librarians can create a sound realistic technology plan and implementing that plan by identifying each step necessary to accomplish the library s goals As they follow this road map from beginning to end library staff will be able to meet the technology needs of their communities and to achieve their library s technology goals This step by step guide takes the reader through the process of successfully creating and implementing a library technology plan Each chapter addresses an aspect of planning

and implementation from conducting a technology audit and selecting appropriate devices to deploying new technologies and training staff and users Further this LITA guide will help librarians evaluate the success of their work in developing and implementing their technology plans **O.C.S.
