Explaining Suicide Cheryl L. Meyer, Taronish Irani, Katherine A.

Hermes, Betty Yung, 2017-01-05 The rate of suicides is at its highest level in nearly 30 years Suicide notes have long been thought to be valuable resources for understanding suicide motivation but up to now the small sample sizes available have made an in depth analysis difficult Explaining Suicide Patterns Motivations and What Notes Reveal represents a large scale analysis of suicide motivation across multiple ages during the same time period This was made possible via a unique dataset of all suicide notes collected by the coroner s office in southwestern Ohio 2000 2009 Based on an analysis of this dataset the book identifies top motivations for suicide how these differ between note writers and non note writers and what this can tell us about better suicide prevention The book reveals the extent to which suicide is motivated by interpersonal violence substance abuse physical pain grief feelings of failure and mental illness Additionally it discusses other risk factors what differentiates suicide attempters from suicide completers and lastly what might serve as protective factors toward resilience Analyzes 1200 suicide cases from one coroner s office Identifies the top motivations for suicide that are based on suicide notes Discusses the extent to which suicides are impulsive vs planned Leads to a better understanding on how to prevent suicide Emphasizes resilience factors over risk factors **Caregiver Substance Use and Child Trauma** Michele

Staton-Tindall, Ginny Sprang, Lala Straussner, 2016-03-16 Research has consistently shown that there is a link between caregiver substance use and child maltreatment but less attention has been given to child trauma exposure The co occurrence of caregiver substance misuse and child trauma exposure is a prevailing problem that has confounded social work prevention protection and treatment efforts with both children and adults for years However there has been minimal empirical and clinical literature focusing on child trauma as an outcome of caregiver substance use This work is designed to be the catalyst for sustained intellectual inquiry about how caregiver substance use child maltreatment and violence exposure can be understood in theory and practice To this end the research presented in this book highlights the state of the science the impact of the phenomenon and the policy and practice questions that must be addressed Implications for social work practice are highlighted in order to attenuate these deleterious and pervasive problems in the future This book was originally published as a special issue of the Journal of Social Work Practice in the Addictions **Innovations in**

The Economic Analysis of Substance Use and Abuse Frank J. Chaloupka,Michael Grossman,Warren K. Bickel,Henry Saffer,2009-02-15 Conventional wisdom once held that the demand for

addictive substances like cigarettes alcohol and drugs was unlike that for any other economic good and therefore unresponsive to traditional market forces Recently however researchers from two disparate fields economics and behavioral psychology have found that increases in the overall price of an addictive substance can significantly reduce both the number of users and the amounts those users consume Changes in the full price of addictive substances including monetary value time outlay effort to obtain and potential penalties for illegal use yield marked variations in behavioral outcomes and demand The Economic Analysis of Substance Use and Abuse brings these distinctive fields of study together and presents for the first time an integrated assessment of their data and results Unique and innovative this multidisciplinary volume will serve as an important resource in the current debates concerning alcohol and drug use and abuse and the impacts of legalizing illicit drugs
