the participants own actions and interactive involvement Through the learning factory various stakeholders can grasp the complex technical and organizational interrelationships of today s industrial environment and acquire the competencies to systematically improve it The Conference on Learning Factories CLF provides a regular platform for academic educational and industrial stakeholders to exchange the latest knowledge and developments in this domain The Conference on Learning Factories CLF is the annual conference of the International Association of Learning Factories IALF attracting top academics and researchers in the field of learning factories to meet engage and share their R D findings The goal of the CLF is to promote cooperation among members to achieve excellence in teaching and research in the field of learning factories Each year the conference attracts about 130 participants worldwide The 15th Conference on Learning Factories CLF was hosted by the Department of Industrial Engineering at Stellenbosch University in the beautiful town of Stellenbosch South Africa The conference covered the following main topics technology implementation and evaluation related to learning factories learning and didactic processes and evaluation related to learning factories learning factory business models and cooperation industry and academic learning factory concepts and infrastructure and learning factories for sustainability and resilience

Industrial Robot Handbook Richard K. Miller, 2013-11-21 These are exciting times for manufacturing engineers It has been said that American industry will undergo greater changes during the 1980 and 1990 decades than it did during the entire eight preceding decades of this century The industrial robot has become the symbol of this progress in computer integrated manufacturing This book is for engineers and managers in manufacturing industries who are involved in implementing robotics in their operations With tens of thousands of industrial robots already in use in the United States there are plenty of role models for proposed applications to be patterned after This book provides an overview of robot applications and presents case histories that might suggest applications to engineers and managers for implementation in their own facilities The application of industrial robots were well developed in the late 1970s and early 1980s While the reader may note some of the examples discussed in this handbook incorporate older robot models it is the application that is of interest As Joseph Engelberger the founding father of robotics has pointed out industrial robots in 1988 are doing pretty much the same kind of work as they did in 1980
