Neil Cockett on Bunkers Neil Cockett, 2020-11-25 Bunkers are the lifeblood of the shipping industry their availability quality and above all else cost often determine whether a shipowner can operate efficiently and profitably Cockett on Bunkers provides those involved in the shipping and oil industries with an understanding of the worldwide bunker fuel industry and a comprehensive manual that can be used as a reference in day to day bunker management and operation Cockett on Bunkers contains up to date information on marine fuel standards and monitoring services bunker buying techniques bunker suppliers and the art of blending pricing and bunkering operational procedures and takes into account recent developments in these areas Written in an accessible style with the emphasis on practical interpretation **Criteria for movements of moored ships in harbours - a practical guide**, 1995 **Ports '80** John Mascenik, American Society of Civil Engineers. Committee on Ports and Harbors, 1980 Fifty seven papers dealing with the design and construction of ports and terminals used for the transportation of oil coal and liquified gasses particularly LNG **Inland & Maritime Waterways & Ports** G. Willems, M. Abecasis, M. M. Catena, 2013-10-02 Inland sedimentation reduction and improving and maintaining navigable depths in alluvial channels integration of ocean coastal inland navigation and improvements of maritime ports and inland terminals The second section starts with discussions of the developments in the construction of ships navigational aids waterways and harbors traffic management and installations with particular emphasis on risk analysis and safety criteria regarding transportation unloading and storage of liquefied natural and petroleum gases Other topics covered in this section include economic optimization of the whole dredging cycle cargo handling systems and equipment design and construction of port facilities and arrangement of quay platforms and coastal erosion caused by harbor works and corrective measures This book will prove useful to design and navigation engineers and researchers Lees' Loss Prevention in the Process Industries Frank Lees, 2005-01-10 Over the last three decades the process industries have grown very rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport Plants have become larger and are often situated in or close to densely populated areas Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough Bhopal Chernobyl Three Mile Island the Phillips 66 incident and Piper Alpha to name but a few The field of Loss Prevention is and continues to be of supreme importance to countless companies municipalities and governments around the world because of the trend for processing plants to become larger and often be situated in or close to densely populated areas thus increasing the hazard of loss of life or property This book is a detailed guidebook to defending against these and many other hazards It could without exaggeration be referred to as the bible for the process industries This is THE standard reference work for chemical and process engineering safety professionals For years it has been the most complete collection of information on the theory practice design elements equipment regulations and laws covering the field of process safety An entire library of alternative books and cross

referencing systems would be needed to replace or improve upon it but everything of importance to safety professionals engineers and managers can be found in this all encompassing reference instead Frank Lees world renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world's chief experts in this field Sam Mannan is professor of chemical engineering at Texas A&M principles practice codes standards data and references needed by those practicing in the field
