David L. Hough, 2009-09-01 *Middle Grades Research Exemplary Studies Linking Theory to Practice* is the first and only book to present what is perhaps the most thoroughly scrutinized group of studies focusing on middle grades education issues ever assembled. Each research project undertaken by the contributing authors herein resulted in the publication of a scholarly paper. As a collection, the ten studies featured in this book are the crème de la crème of submissions to the *Middle Grades Research Journal* between August 2006 and December 2008. They are the ten highest peer-reviewed manuscripts examined by members of the MGRJ Review Board, each having undergone careful blinded examination by three or more experts in the sub-specialty area addressed by the research study conducted. In addition, each study serves to exemplify how sound practical research findings can be linked to classroom practice in middle grades classrooms. *Middle Grades Research Exemplary Studies Linking Theory to Practice* is a must-read for university professors and a useful tool for middle grades educators across all subject areas and school settings. Professors who teach middle grades courses at both the undergraduate and graduate levels will find the book to be a superb supplemental accelerated readings text. Every college-level middle grades education course should make this book an integral part of class discussions. The book is also an excellent professional development study group resource for middle grades principals and classroom teachers across all subject areas. School-level Professional Learning Communities (PLCs) will find that Dr. Hough's book stimulates scholarly thought, promotes discussion, and demonstrates how educational theory can and should impact teaching and learning. [Middle Grades Research Journal](#)

Larry G. Daniel, 2017-06-01 *Middle Grades Research Journal* (MGRJ) is a refereed, peer-reviewed journal that publishes original studies providing both empirical and theoretical frameworks that focus on middle grades education. A variety of articles are published quarterly in March, June, September, and December of each volume year. **Journal for Research in Mathematics Education**, 1998 **The End of Desegregation?** Stephen J. Caldas, Carl Leon Bankston, 2003. After over half a century of court-directed efforts to redress the historical educational chasm between blacks and whites in the United States, both the past achievements and the future direction of school desegregation are uncertain. Too often, the early gains made in racially desegregating America's schools seem to have been halted and, in many cases, reversed. Urban school decay is once again on the rise with predictable consequences. For the very poorest minority students who have limited educational options apart from dangerous, deteriorating neighborhood schools, drop-out rates are high, standardized test scores are abysmally low, and violence is an everyday fact of life. The gulf between the unskilled, marginalized students being warehoused in these predominantly poor minority schools, on the one hand, and the increasingly high-tech society they cannot compete in, on the other, is growing. This ground-breaking book presents the viewpoints and research of some of the most prominent scholars in the field of school desegregation. It covers virtually the entire spectrum of thinking and scholarship on school desegregation and its promise, success, necessity, pitfalls, and failures. [Essential Readings in Problem-based Learning](#)

Andrew Elbert Walker, Heather Leary, Cindy E. Hmelo-Silver, Peggy A. Ertmer, 2015. This book surveys the state of

problem based learning and assesses the impact of this innovative educational methodology on teaching and research effectiveness across a range of disciplines and in a variety of organizational contexts
