Subject :- Letter of intent for medical school

Respected Sir,

I am John Decosta and applying for medical school course this fall season. I have been interviewed on the 1st of March 20XX and received a letter from Norton Medical University for admission. The initial speech by the interviewer regarding the medical profession and a brief introduction of the medical schools was simply amazing.

I was asked about my opinion regarding my career aim and reason for pursuing medical studies. I was advised to choose a school that provides me best opportunity to take up the specialization that I desire to undertake. With regard to this I wish to request your esteemed medical authority to give me an opportunity to take admission from Edinburgh Medical University which provides me a chance to take up bio-medical studies which I am highly interested in.

I am right now learning the different ways of research that the field of bio-medical study proposes and this has helped me to a very large extent in getting a clear grasp of the subject matter. Moreover Edinburgh Medical University is one such university that has continuous research being undertaken by world's most renowned medical experts.

Advanced Surgical Recall Lorne H. Blackbourne, Damle Sagar, Anikar Chhabra, 2004 Advanced Surgical Recall is a study aid for students and residents who have progressed past their introductory experiences in the discipline of surgery. In addition to providing in depth coverage of the basic sciences and advanced and subspecialty surgical procedures this edition is thoroughly illustrated with detailed images of important anatomic landmarks and appropriate surgical techniques. It is a useful resource for studying on rounds, the ABSITE exam and surgery boards. It can also serve as a source of questions for teachers of surgery particularly for the activity of teaching rounds. The book is written in the popular rapid fire question and answer format of the Recall series.

Academic Global Surgery Mamta Swaroop, Sanjay Krishnaswami, 2015-12-17 This seventh book in the series of Success in Academic Surgery looks to sustain the field and facilitate the next generation of leaders in Academic Global Surgery. It brings together a catalogue of current knowledge, needs and pathways to a career in the field. Academic Global Surgery involves educational research and clinical collaborations between academic humanitarian surgeons in high income countries, HIC, their low and middle income country, LMIC, partners and their respective academic institutions. The goal of these collaborations is improving understanding of surgical disease and increasing access to and capacity for surgical care in resource poor regions. In the last few years the rapid exchange of ideas through social media and other technologies has combined with an increasing appreciation of worldwide health disparities to put the issue of global health at the forefront of our consciousness. Although traditionally neglected within public health initiatives, surgical disease is now recognized as a major contributor to death and disability worldwide while surgical therapy in resource poor areas is increasingly being shown to be cost effective. In response to this growing recognition what began as mission trips and short term clinical volunteerism in the developing world has evolved into a burgeoning new field with a broader scope. While the tremendous recent interest from medical students and residents in Global Surgery has stimulated an exponential growth of interest in this field, current surgical literature has highlighted the need for further development and delineation of this new discipline within academic surgery.
