

NEWTON'S SECOND LAW: $F_{\text{net}} = ma$ (B)

Introduction:

Newton's second law (also called the law of forcing) describes the relationship between the acceleration of an object, its mass, and the net force acting on it. It can be summarized by the equation $F_{\text{net}} = ma$. In this formula, the object's mass must be in kg, the acceleration must be in m/s^2 and the net force must be in N. However, you may rearrange this formula to solve for other variables.

It may be useful to use a formula triangle, such as the ones on the right, to help you remember the equations for F_{net} , mass, and acceleration. To use the formula triangle, simply cover the quantity you want to find and the triangle will show you the correct formula.
