immune checkpoint blockade PD 1 PD L1 Tim3 and or CTLA 4 among others ii alterations in metabolic pathways and iii the utilization of biological agents such as hormones cytokines or neutralizing antibodies Overall these therapies aim to convert a pathological immune response into a protective one via the control or reprogramming of specific T cell subsets This Research Topic aims to provide a comprehensive overview of the diverse strategies focused on modulating T cell function that aim to prevent or revert pathological immune responses against pathogens and self antigens We welcome the submission of Reviews Mini Reviews and Original Research articles that discuss a diversity of approaches aimed at modulating T cell responses in autoimmunity and infection and how they have been or could be used to design novel immunotherapies
