Reshaping the Political Arena in Latin America Eduardo Silva,Federico Rossi,2018-05-22 Neoliberalism changed the face of Latin America and left average citizens struggling to cope in many ways Popular sectors were especially hard hit as wages declined and unemployment increased The backlash to neoliberalism in the form of popular protest and electoral mobilization opened space for leftist governments to emerge The turn to left governments raised popular expectations for a second wave of incorporation Although a growing literature has analyzed many aspects of left governments there is no study of how the redefinition of the organized popular sectors their allies and their struggles have reshaped the political arena to include their interests until now This volume examines the role played in the second wave of incorporation by political parties trade unions and social movements in five cases Argentina Bolivia Brazil Ecuador and Venezuela The cases shed new light on a subject critical to understanding the change in the distribution of political power related to popular sectors and their interests a key issue in the study of postneoliberalism

Congressional Record United States. Congress,2009 *'Black but Human'* Carmen Fracchia,2019-10-16 Black but Human is the first study to focus on the visual representations of African slaves and ex slaves in Spain during the

Hapsburg dynasty The Afro Hispanic proverb Black but Human is the main thread of the six chapters and serves as a lens through which to explore the ways in which a certain visual representation of slavery both embodies and reproduces hegemonic visions of enslaved and liberated Africans and at the same time provides material for critical and emancipatory practices by Afro Hispanics themselves The African presence in the Iberian Peninsula between the late fifteenth century and the end of the seventeenth century was as a result of the institutionalization of the local and transatlantic slave trades In addition to the Moors Berbers and Turks born as slaves there were approximately two million enslaved people in the kingdoms of Castile Arag n and Portugal The Black but Human topos that emerges from the African work songs and poems written by Afro Hispanics encodes the multi layered processes through which a black emancipatory subject emerges and a black nation forges a collective resistance It is visually articulated by Afro Hispanic and Spanish artists in religious paintings and in the genres of self portraiture and portraiture This extraordinary imagery coexists with the stereotypical representations of African slaves and ex slaves by Spanish sculptors engravers jewellers and painters mainly in the religious visual form and by European draftsmen and miniaturists in their landscape drawings and sketches for costume books

The Handbook of Rationality Markus Knauff, Wolfgang Spohn, 2021-12-14 The first reference on rationality that integrates accounts from psychology and philosophy covering descriptive and normative theories from both disciplines Both analytic philosophy and cognitive psychology have made dramatic advances in understanding rationality but there has been little interaction between the disciplines This volume

offers the first integrated overview of the state of the art in the psychology and philosophy of rationality. Written by leading experts from both disciplines, *The Handbook of Rationality* covers the main normative and descriptive theories of rationality: how people ought to think, how they actually think, and why we often deviate from what we can call rational. It also offers insights from other fields such as artificial intelligence, economics, the social sciences, and cognitive neuroscience. The Handbook proposes a novel classification system for researchers in human rationality and it creates new connections between rationality research in philosophy, psychology, and other disciplines. Following the basic distinction between theoretical and practical rationality, the book first considers the theoretical side, including normative and descriptive theories of logical, probabilistic, causal, and defeasible reasoning. It then turns to the practical side, discussing topics such as decision making, bounded rationality, game theory, deontic and legal reasoning, and the relation between rationality and morality. Finally, it covers topics that arise in both theoretical and practical rationality, including visual and spatial thinking, scientific rationality, how children learn to reason rationally, and the connection between intelligence and rationality.

The Oxford Handbook of the Incas Sonia Alconini, R. Alan Covey, 2018-04-02 When Spaniards invaded their realm in 1532, the Incas ruled the largest empire of the pre-Columbian Americas. Just over a century earlier, military campaigns began to extend power across a broad swath of the Andean region, bringing local societies into new relationships with colonists and officials who represented the Inca state. With Cuzco as its capital, the Inca empire encompassed a multitude of peoples of diverse geographic origins and cultural traditions, dwelling in the outlying provinces and frontier regions. Bringing together an international group of well-established scholars and emerging researchers, this handbook is dedicated to revealing the origins of this empire, as well as its evolution and aftermath. Chapters break new ground using innovative multidisciplinary research from the areas of archaeology, ethnohistory, and art history. The scope of this handbook is comprehensive. It places the century of Inca imperial expansion within a broader historical and archaeological context and then turns from Inca origins to the imperial political economy and institutions that facilitated expansion. Provincial and frontier case studies explore the negotiation and implementation of state policies and institutions and their effects on the communities and individuals that made up the bulk of the population. Several chapters describe religious power in the Andes, as well as the special statuses that staffed the state religion, maintained records, served royal households, and produced fine craft goods to support state activities. The Incas did not disappear in 1532, and the volume continues into the Colonial and later periods, exploring not only the effects of the Spanish conquest on the lives of the indigenous populations but also the cultural continuities and discontinuities. Moving into the present, the volume ends with an overview of the ways in which the image of the Inca and the pre-Columbian past is memorialized and reinterpreted by contemporary Andeans.
