Mathematics Teacher Education in the Public Interest Bharath Sriraman,Laura J. Jacobsen,Jean Mistele,2013-02-01 Mathematics teacher education has a critical role to play in preparing teachers to put at center stage goals to support equity in mathematics education and to diversify student interest and participation in mathematics These goals must also resonate with broader public interest goals to improve educational and social conditions both in the U S and abroad The Mathematics Teacher Education in the Public Interest book aims to support mathematics teacher educators to prepare teachers with new knowledge and skills to support all students to learn mathematics and to become informed engaged and critical citizens within their community nation and world While internationally there is considerable interest among mathematics educators in issues of equity and social justice the literature on mathematics teacher education for equity and social justice thus far has been very limited The book

provides theoretical discussions on the need for equity and social justice emphases in mathematics teacher education as well as practical examples from mathematics teacher educators documenting their own professional efforts to center practices on equity and social justice. Section emphases include critical perspectives on mathematics teacher education, the use of equity and social justice-themed activities in mathematics teacher preparation courses, and issues of identity and community and cultural contexts in mathematics teacher education. In addition, syntheses of major ideas of the book are offered by experienced researchers.

The Troika of Adult Learners, Lifelong Learning, and Mathematics Katherine Safford-Ramus, Pradeep Kumar Misra, Terry Maguire, 2016-05-02 This book presents a synopsis of six emerging themes in adult mathematics numeracy and a critical discussion of recent developments in terms of policies, provisions, and the emerging challenges, paradoxes, and tensions. It also offers an extensive review of the literature on adult mathematics education. Why do adults want to learn mathematics? Did they enjoy mathematics at school so much that they want to continue? NO. Most of these adults have to learn mathematics because it is part of a formal qualification they need because their job demands the ability to apply mathematics or because they need basic numeracy in their daily lives. Lastly, the authors discuss five potential strategies to promote lifelong learning of mathematics among adult learners.

Early Geometrical Thinking in the Environment of Patterns, Mosaics and Isometries Ewa Swoboda, Paola Vighi, 2016-09-09 This book discusses the learning and teaching of geometry with a special focus on kindergarten and primary education. It examines important new trends and developments in research and practice and emphasizes theoretical, empirical, and developmental issues. Further, it discusses various topics including curriculum studies and implementation, spatial abilities and geometric reasoning, as well as the psychological roots of geometrical thinking and teacher preparation in geometry education. It considers these issues from historical, epistemological, cognitive, semiotic, and educational points of view in the context of students' difficulties and the design of teaching and curricula.
