Abstract

Discussion is mainly the section in a research paper that makes the readers understand the exact meaning of the results achieved in a study by exploring the significant points of the research, its implications in different areas of the study, and the improvements that the study can make for future developments. However, it is commonly challenging for researchers to realize what should be covered in the discussion section of a research paper and how to write it to ensure it helps to sell the research paper to the audience. The main aim of this article is to provide information on writing the discussion section appropriately in a research paper. For doing this, more details about the purpose of writing a discussion in an academic research project are provided and differences between discussion and introduction are clarified. Then, the important points that need to be considered or avoided in a standard discussion section are discussed.

Keywords: Discussion; Research; Guide; Article; Academic Paper; Research Project; Research Process; Research Sections; Research Elements

What Does Discussion Mean in a Research Paper?

In a research paper, the hypothesis, the purpose, and the design of the study should be regarded initially. You need also describe your research methods, collect data, analyze them and then obtain the results. Now, you are ready to add the discussion section with the aim of providing more effective implications about your study (based on the results) and achieving the real meaning of your result.

Generally, this section includes an evaluation and interpretation of your result as well as the differences between them and your written hypothesis discussed in the initial parts of your paper. However, the critical point to consider is thinking about this section at the beginning of the research process, even though it comes at

the end of the paper. For this purpose, you should design specific questions based on the outset of your study. These questions should be developed based on the following:

- The importance of the study
- The relationship between the study and previous similar ones
- The limitations of the design of the study [3].

It can be also noted that, in some other kinds of papers, for example reaction papers or essays, discussion section is used to gain a summary about the main points of the research paper together

Sample Of A Discussion Paper:

Sample Survey Theory Paul Kottnerus, 2012-11-12 This volume deals primarily with the classical question of how to draw conclusions about the population mean of a variable given a sample with observations on that variable Another classical question is how to use prior knowledge of an economic or definitional relationship between the population means of several variables provided that the variables are observed in a sample The present volume is a compilation of two discussion papers and some additional notes on these two basic questions The discussion papers and notes were prepared for a 15 hour course at Statistics Netherlands in Voorburg in February 2000 The first discussion paper is entitled A Memoir on Sampling and the Generalized Intrasample Correlation Coefficient 1999 It describes a new approach to the problem of unequal probability sampling The second discussion paper The General Restriction Estimator 2000 deals with the problem of how to find constrained estimators that obey a given set of restrictions imposed on the parameters to be estimated Parts I and II of the volume provide a novel and systematic treatment of sampling theory considered from the angle of the sampling autocorrelation coefficient ρ The same concept plays an important role in the analysis of time series Although this concept is also well known in sampling theory for instance in cluster sampling and systematic sampling generalizations of ρ for an arbitrary sampling design are to my knowledge not readily found in the literature

A Companion to Theoretical Econometrics Badi H. Baltagi, 2008-04-15 A Companion to Theoretical Econometrics provides a comprehensive reference to the basics of econometrics This companion focuses on the foundations of the field and at the same time integrates popular topics often encountered by practitioners The chapters are written by international experts and provide up to date research in areas not usually covered by standard econometric texts Focuses on the foundations of econometrics Integrates real world topics encountered by professionals and practitioners Draws on up to date research in areas not covered by standard econometrics texts Organized to provide clear accessible information and point to further readings

Continuous-Time Econometrics G. Gandolfo, 1993 Time elapses continuously not in discrete jumps of say a quarter or a month Hence models specified in continuous time are more realistic than the usual models in which time is taken to elapse in such discrete jumps However much data available to economists is of the discrete time kind This was once thought to render impossible the econometric estimation of continuous time models Over the past decade a body of theory has been built up to show that such estimation is not only possible but has serious practical applications This collection of essays aims to provide not only the latest developments in the theory but also with original examples to show how it is possible to implement in real situations Econometricians may find this book useful reading as may

those concerned with macroeconomic issues who wish to keep in touch with the frontiers of their subject Macroeconomic Theory Volker Böhm, 2017-10-30 This textbook offers a unique approach to macroeconomic theory built on microeconomic foundations of monetary macroeconomics within a unified framework of an intertemporal general equilibrium model extended to a sequential and dynamic analysis It investigates the implications of expectations and of stationary fiscal policies on allocations on the quantity of money and on the dynamic evolution of the economy with and without noise The text contrasts and compares the two main competing approaches in macroeconomics within the same intertemporal model of a closed monetary economy the one postulating full price flexibility to guarantee equilibrium in all markets at all times under perfect foresight or rational expectations versus the so called disequilibrium approach where trading occurs at non market clearing prices and wages when these adjust sluggishly from period to period in response to market disequilibrium signals

Resources in Education ,1998 Encyclopedia of Statistical Sciences, Volume 1 ,2005-12-16 Countless professionals and students who use statistics in their work rely on the multi volume Encyclopedia of Statistical Sciences as a superior and unique source of information on statistical theory methods and applications This new edition available in both print and on line versions is designed to bring the encyclopedia in line with the latest topics and advances made in statistical science over the past decade in areas such as computer intensive statistical methodology genetics medicine the environment and other applications Written by over 600 world renowned experts including the editors the entries are self contained and easily understood by readers with a limited statistical background With the publication of this second edition in 16 printed volumes the Encyclopedia of Statistical Sciences retains its position as a cutting edge reference of choice for those working in statistics biostatistics quality control economics sociology engineering probability theory computer science biomedicine psychology and many other areas **Bulletin** Institution of Mining and Metallurgy (Great Britain),1912 *Minutes and Report of Committee Recommendations* ,1990-04 *Organising, Conducting and Reporting an SCP City Consultation* ,1999 *Economics Working Papers: a Bibliography* ,1986 *Federal Register* ,1999-07-08 **Paper** ,1919 Paper American Society of Mechanical Engineers,1914 **Technologic Papers** ... Evaluating Active Labour Market Policies Patrick A. Puhani,2012-12-06 Most governments in today s market economies spend significant sums of money on labour market programmes The declared aims of these programmes are to increase the re employment chances of the unemployed This book investigates which active labour market programmes in Poland are value for money and which are not To this end modern statistical methods are applied to both macro and microeconomic data It is shown that training programmes increase whereas job subsidies and public works decrease the re employment opportunities of the unemployed In general all active labour market policy effects are larger in absolute size for men than for women By surveying previous studies in the field and outlining the major statistical approaches that are employed in the evaluation literature the book can be of help to any student interested in programme evaluation irrespective

of the particular programme or country concerned *Mergers and Economic Efficiency: Proceedings of a workshop and supplementary papers* ,1980 Technologic Papers of the Bureau of Standards United States. Bureau of Standards,1921
