

PURPOSE OF GEOGRAPHY

- Geography studies interaction between man and his environment,
- Some questions that geographers answer where things are on the Earth, why, how places are different from one another and how do humans affect the environment.
- As a synthesizing discipline it gives us the flexibility to study any interesting subject through the lens of the spatial perspective.

Patrocínio,José Mauro Nunes,2019-10-10 The subject of Design Policies is slowly growing to be broadly discussed although most of the time from within a design practitioners and design enthusiasts bubble Public administration is gradually embracing design from another perspective using Design Thinking to develop programmes and services Lawmakers and government executives are still distant frequently without a real knowledge of design and its potential Governments and designers as well seem to be contented by design promotion actions or programmes which are frequently wrongly accepted as a design policy From this prospect this book intends to be a contribution to the debate of Design Policies nourished by past experiences and reflections but also from current practices as in Europe and China for example The book was originally meant in hindsight of a document produced in the seventies by the United Nations Industrial Development Organization UNIDO within the context of a partnership with the International Council of Societies of Industrial Design ICSID This partnership resulted in a document discussing design as a driver of economic growth prepared by Gui Bonsiepe in 1973 and then summarized by the UNIDO Secretariat in 1975 as the Basic guidelines for policy of industrial design in developing

countries Both documents were made available for this book by UNIDO and are reproduced here as appendices Although originally aimed at developing countries after these four decades of unsettling growth of wicked problems this theme deserves to be reviewed and discussed thoroughly Design might play a very significant role when approaching contemporary problems such as rearranging urban spaces urban mobility tourism immigration housing violence and environment among others These not so new wicked problems prompts to a whole new perspective on design and public design policies that goes beyond the original context here The perspective of the Third World economy as it was known at the time might offer insights to understand and perhaps solve problems of any size economy especially if we consider the aspects of local or regional problems It is time to exercise empathy towards someone else s problems and to reflect under different scales and measures and design seem to be the perfect instrument for it Mugendi M Rithaa former President of ICSID currently the WDO World Design Organization saluted the book as the most important contribution on this field in the last ten years cited in the final remarks of his interview in the chapter Design in Africa I participate therefore I am In Brazil the book was awarded twice initially at the Objeto Brasil International Design Award in May 2016 and then later at the same year at the MCB Museum of the Brazilian Home Design Awards of 2016 The jury of this later has acclaimed the book as a theoretical and academic milestone with potential to change the current practice and understanding of Design After the successful launch in Portugal with conferences in three design schools in 2016 the book was selected in 2017 to the exhibition Brasil Hoje at MUDE Lisbon s Museum of Fashion and Design The curator Frederico Duarte highlighted in the catalogue The first and indispensable book on design and development in the Portuguese language In 2018 the book was selected in Spain to be part of BID the Ibero American Design Biennial in Madrid In the same year was published an e book edition in Portuguese to make it more accessible at the same time that this first English edition started being prepared
