Regulation of Food Packaging in Europe and the USA Derek J Knight,Lesley A Creighton,2004 Annotation A wide variety of plastics are used in food contact applications and it is important that such plastics do not affect the food with which they come into contact The objective of food packaging legislation is to protect the consumer by controlling the contamination of food by chemicals transferred from the packaging Food packaging regulations are constantly under revision and differ significantly between Europe and the USA

This report provides a clearly written summary of the current legislation surrounding the use of plastics in contact with food. It discusses the plastics used in food packaging, their characteristics and applications. This review is accompanied by around 400 abstracts from papers and books in the Rapra Polymer Library database.

Thermoforming Geza Gruenwald, 2018-05-04. FROM THE FOREWORD: Dr Gruenwald has indicated the desirable properties of polymeric materials for differing applications; thus his text is especially useful for polymer chemists who must tailor plastic materials for specific groups of applications. Engineers in extruding and calendering film and sheet will benefit from the intimate relationships elucidated between processing parameters imposed upon stocks employed in thermoforming and the products thereof. Mold designers are provided with a complete guide that will enable them to avoid the less obvious pitfalls and wasted effort so often experienced in the evolution of molds for especially complex parts. Quite likely Dr Gruenwald's suggestions will lead to considerable benefits to those who read and practice by this remarkable exposition of thermoforming technology.
