Response to Intervention RtI involves evaluating the degree that students a master academic material in response to effective instruction and b demonstrate appropriate prosocial behavior in response to effective classroom management When students are not progressing or responding academically or behaviorally to effective instructional conditions RtI includes a functional assessment problem solving process to determine the reasons for the lack of success and the implementation of strategic through intensive interventions to help those students progress and be successful At an operational level RtI is often described as working within a flexible three tiered system that is guided by students academic and behavioral outcomes The goal ultimately is to facilitate learning and mastery by ensuring effective instruction and classroom management for all students Tier 1 and by speeding early and effective interventions to those students who need more strategic interventions Tier 2 or more intensive interventions Tier 3 interventions see the diagram below Critically effective RtI processes focus on a interventions not diagnostic labels b individualized functional assessment not universal or standard assessment batteries tests or evaluation protocols and c student focused contextual decision making not rigid psychometric decision rules At the core of this process is a data based functional assessment problem solving process While there are many sound problem

solving models and processes all of the effective ones have four primary components Problem Identification Problem Analysis Intervention and Evaluation While some utilize more steps or different semantic terms all of the research based models components can be distilled down to these four primary components From an RtI perspective it is critical to note that RtI is an evaluation step That is it is impossible to determine whether a student has responded to an intervention if the intervention has not already been implemented This Electronic Book E Book focuses on describing the critical components of effective RtI systems and approaches at the school district and state levels as well as the step by step the Data based Functional Assessment Problem Solving process that has been used nationally by Project ACHIEVE as the SPRINT School Prevention Review and Intervention Team process In doing this a Problem solving Consultation Intervention context is used throughout and effective instruction assessment progress monitoring intervention and evaluation processes from kindergarten through high school are highlighted In addition the seven steps of the Data based Functional Assessment Problem Solving process are presented in detail and applied to case studies Readers will learn how to scientifically clarify and identify referred student problems how to generate hypotheses to explain why these problems exist how to test and validate in invalidate these hypotheses and then how to link confirmed hypotheses to evidence based interventions and to evaluate students responsiveness to them Numerous case studies are presented throughout the E Book to demonstrate the RtI process and to provide readers with examples of how to implement it at student school system and state levels Readers should finish the book with a working understanding of how to implement effective RtI processes at all of these levels and how to strategically plan and evaluate the implementation process

In Support of Student Data Kristan Rodriguez, 2025-11-18 A hands-on workbook that empowers educators to create a more effective and inclusive learning environment. *In Support of Student Data: A Data Workbook for MTSS Teams* is a practical tool that student support teams can use every day to make meaningful data-driven decisions. The first section of this book provides a framework and protocols for using data to support MTSS and drive systemic change, helping you align resources such as schedules, staffing, and materials to function effectively within a robust tiered system of support. The second section was built to replace antiquated and reactive pre-referral processes. This workbook walks teams through a clear step-by-step approach to identifying student needs early and matching them with the right level of support. After many successful years of supporting individual districts and schools, Dr. Rodriguez introduces her MTSS2 framework to the world. The workbook helps educators move away from gatekeeping systems where students have to fail or meet rigid criteria before receiving help toward responsive, evidence-based solutions where real-time data drives immediate tiered support. Whether you're designing Tier 2 interventions, reviewing screening data, or crafting individualized student support plans, this guide provides ready-to-use tools. This workbook includes: A modern process for student support teams to

collaboratively review data and define timely tiered supports Protocols that guide each stage of intervention planning Templates checklists and visual tools that simplify decision making and streamline team meetings Real world examples analogies and case studies that make MTSS accessible and actionable Designed for use by MTSS teams In Support of Student Data helps organizations shift from using outdated pre referral systems to a flexible student first approach It s the essential playbook for schools looking to catch students before they fall and build systems that work for all learners RTI & Differentiated Reading in the K-8 Classroom William N.
