Physics of Non-tetrahedrally Bonded Binary Compounds 2 Otfried Madelung, 1983 **Free Energy of Formation of Binary Compounds** Thomas Binnington Reed, 1971 **The Structures of Binary Compounds** J. Hafner, F. Hulliger, W.B. Jensen, J.A. Majewski, K. Mathis, P. Villars, P. Vogl, 2013-10-22 Up to date compilation of the experimental data on the structures of binary compounds by Villars and colleagues Coloured structure maps which order the compounds into their respective structural domains and present for the first time the local coordination polyhedra for the 150 most frequently occurring structure types pedagogically very helpful and useful in the search for new materials with a required crystal structure Crystal coordination formulas a flexible notation for the interpretation of solid state structures by chemist Bill Jensen Recent important advances in understanding the quantum mechanical origin of structural stability presented in two clearly written chapters by leading experts in the field Hafner Majewski and Vogl The Structures of Binary Compounds presents not only the most up to date compilation of the experimental data on the structures of binary compounds but also the recent important theoretical advances in understanding the quantum mechanical origin of structural stability In addition to this volume a large wall chart displaying the structure maps for the AB AB₂ and AB₃ stoichiometries together with the corresponding coordination polyhedra has been published The first half of the book details the successful ordering of the known experimental data in two or three dimensional coloured structure maps the 150 most frequently occurring structure types being characterized for the first time by their local coordination polyhedra The second half of the book details the success of first principle theoretical calculations within the Local Density Functional Approximation in predicting the correct ground state structures of binary semiconductors insulators and metals The book concludes with a chapter on the cohesion and structure of solids from the more localized tight binding point of view **Crystal and Solid State Physics** John B.
