collection of articles on theoretical and experimental physics as well as related topics in mathematics. One article proposes correct solutions for rotating and charged black holes suggesting they have an oblate spheroid shape rather than being perfectly spherical. Another paper presents a new cosmology framework based on a Krogh gravity theory that predicts the Hubble redshift curve without needing concepts like dark energy or expansion. Other topics include an analysis of fundamental forces from numerical relations, a re-examination of quantum mechanics in the microworld, and the feasibility of non-quantum teleportation.
