The Roeper School Don Ambrose, Bharath Sriraman, Tracy L. Cross, 2013-12-30 How can we design schools that energetically promote intellectual development while also attending to the social emotional and ethical growth of students? In today's frenzied climate of accountability driven school reform it is difficult to establish anything more than achievement of superficial knowledge and skill. Fortunately there is a vibrant example of holistic student centered education that engenders dynamic multidimensional student growth. The Roeper School enables students to develop strong intrinsic motivation as they discover aspirations and develop talents consistent with those aspirations. Simultaneously from a very young age students take considerable responsibility for their own actions and for the processes that go on in their school. Following the Roeper philosophy each student generates a long term sense of purposeful direction a strong sense of intrapersonal awareness impressive creative and critical thinking skills and a finely tuned sense of ethical responsibility. Upon graduation Roeper students are well prepared to find or create highly productive niches in the world of work and rewarding personal lives while serving as mature ethical citizens of a complex 21st century globalized society. This book includes descriptions of the multidimensional education the Roeper School provides. The perspectives in the volume are diverse coming from leading researchers and theorists in the field of gifted education as well as teachers administrators alumni and current students from the school itself. Overall the book provides a beacon of hope for 21st century education.

Learning Progressions in Science Alicia C. Alonzo, Amelia Wenk Gotwals, 2012-07-30 Learning progressions descriptions of increasingly sophisticated ways of thinking about or understanding a topic. National Research Council 2007 represent a promising framework for developing organized curricula and meaningful assessments in science. In addition well grounded learning progressions may allow for coherence between cognitive models of how understanding develops in a given domain classroom instruction professional development and classroom and large scale assessments. Because of the promise that learning progressions hold for bringing organization and structure to often disconnected views of how to teach and assess science they are rapidly gaining popularity in the science education community. However there are significant challenges faced by all engaged in this work. In June 2009 science education researchers and practitioners as well as scientists psychometricians and assessment specialists convened to discuss these challenges as part of the Learning Progressions in

Science LeaPS conference The LeaPS conference provided a structured forum for considering design decisions entailed in four aspects of work on learning progressions developing assessments to elicit student responses relative to learning progressions modeling and interpreting student performance with respect to a learning progressions and using learning progressions to influence standards curricula and teacher education This book presents specific examples of learning progression work and syntheses of ideas from these examples and discussions at the LeaPS conference

The English Baccalaureate Great Britain: Parliament: House of Commons: Education Committee,2011-07-28 This report suggests that any new performance or curriculum measures affecting schools should only be implemented after proper consultation with key stakeholders and the wider public something which didn't happen with the English Baccalaureate EBac The Committee says that the Government should also have waited until after the conclusion of the National Curriculum Review before introducing the EBac They want the Government to deliver on its promise in the White Paper The Importance of Teaching to use performance tables to put greater emphasis on the progress of every child The report notes that certain academic subjects studied at A level are more valued by Russell Group universities than others but argues that a focus on a fairly narrow range of subjects demanding considerable curriculum time is likely to have negative consequences on the uptake of other subjects The Committee does not make recommendations on which subjects should or should not be included but rather encourages the Government to reconsider the EBac's composition when the National Curriculum Review is concluded The Government should confirm how it will monitor the attainment of children on free school meals in the EBac The report also calls for further international evidence to inform debate on the merits of the EBac evidence the inquiry received did not suggest a link in other countries between the prescribed study of certain academic subjects and improved attainment and prospects for poorer students Elsewhere the report argues that the current arrangements for certification of the EBac should be shelved as should calls for a Technical Baccalaureate to sit alongside the existing award
