Damgaard, Leonidas Milios, Henna Punkkinen, Margareta Wahlström, 2018-05-29 This project examines the market for recycled plastic with a primary focus on post consumer plastic waste because this is considered to be the more problematic The market for plastic waste generated in manufacturing and production is relatively strong and well functioning As a consequence the majority of plastic waste from manufacturing and production is recycled Post consumer waste is much less homogenous it comes from a wide variety of sources and contains a wide variety of plastics and tends to be difficult to collect sort and recycle This project identifies barriers to further utilisation of recycled plastics and analyses a collection of policy tools that could be used to support and expand that market
