Concepts, Policies and Technology for Sustainable Buildings Thanuja Ramachandra,Roshani Palliyaguru,Gayani Karunasena,2025-07-12 This book presents knowledge on sustainability concepts policies and technologies adopted in both developed and developing countries The book covers five themes a advancing sustainability building rating systems b promoting retrofitting buildings and warranting energy efficient buildings c realizing water efficiency within building

structures and application of the circular economy to manage waste and enhance the health and well being of building occupants The first theme includes case study based evidence and solutions to different rating systems used in different countries The second and third themes mainly focus on the achievement of sustainability under the key parameters of energy efficiency and water efficiency through the application of various techniques and technologies such as green roofs green walls and grid tied solar photovoltaic technology with a special emphasis on retrofitting techniques in different case study contexts The fourth theme primarily addresses the need to clarify misconceptions surrounding the concept of the circular economy within the construction industry It explores its broader applications in various contexts aiming to uncover opportunities for knowledge expansion and transfer across different countries The fifth and final theme of the book addresses various good practices and tools developed to enhance the health and well being of building occupants with a primary focus on how such things help achieve sustainable buildings *Rawlinsons Construction Cost Guide 2017* Rawlinsons Group, 2017

Sustainable Retrofitting of Commercial Buildings Richard Hyde, Nathan Groenhout, Francis Barram, Ken Yeang, 2015-01-28 Despite recent improvements in energy efficiency being made in new build it is important that the existing commercial building sector also take action to meet emission reduction targets The objectives and challenges of such action will reduce the risk of the sector becoming obsolete due to high energy use and poor environmental performance This book presents a theory based practice support methodology to deal with sustainable retrofitting opportunities for existing commercial buildings in warm climates using bioclimatic design as the basis The book has four main parts focusing on eco design and renovation bioclimatic retrofitting technological and behavioural change and case studies of retrofitting exemplars In the first part the context of climate change effects on design and renovation at the city scale is discussed The second part looks at bioclimatic retrofitting as a design guide for existing buildings highlighting the significance of architectural design and engineering systems for energy performance The technological and behavioural contexts of the existing building sector policies modelling monitoring and trend analysis in respect to energy and environmental performance are covered in part three The final part gives some case studies showing the effectiveness of strategies suggested for effective environmental performance This book is a must have guide for all involved in the design and engineering of retrofitting projects in warm climates *Rawlinsons Construction Cost Guide 2008*, 2008 *Rawlinsons Construction Cost Guide 2013*, 2013 **Australian National Bibliography**, 1993 *Rawlinsons Construction Cost Guide 2021* Rawlinsons Quantity Surveyors and Construction Cost Consultants, 2021 Australia's largest library of construction cost information providing vital data to all those involved in small projects *Sustainability in Energy and Buildings 2018* Prasad Kaparaju, Robert J. Howlett, John Littlewood, Chandima Ekanyake, Ljubo Vlacic, 2018-11-30 This book contains selected papers from SEB 18 the Tenth International Conference on Sustainability in Energy and Buildings which was organised by KES International and Griffith University and held in Gold Coast Australia in June 2018 SEB 18 invited contributions on a range of

Cost management of all building projects has become increasingly important as clients in the public and private sector demand the highest quality cost planning services with accurate budgeting and cost control. All members of the design team must integrate their activities to ensure that a high quality project is delivered on time and within budget. This book considers building cost planning and cost control from the client and the design team's perspective where all decisions whether concerned with design cost quality time value or sustainability are taken as being interrelated. The latest Royal Institute of British Architects RIBA Plan of Work and the New Rules of Measurement for Early Stage Estimating and Cost Planning issued by the Royal Institution of Chartered Surveyors RICS have been incorporated into this new text. The book follows the building design cost planning process from the crucial inception stages and then through all the design stages to the completion of the technical design contract documentation and the tender. It provides a template for good cost planning practice. An essential addition to this third edition is the introduction of integrated design and documentation processes captured in building Information modelling BIM on line cost databases and computerised methods of cost planning. The integrated approaches are explained and provide vital information and knowledge for practitioners involved in building projects. All stakeholders involved in development and design and client teams in public and private sector policy making and implementation need to understand the new approaches to design management processes and how cost planning and design approaches are adapting to using the new technology in practice. The interactive style using in text and review questions makes this ideal for students and practitioners alike in property architecture construction economics construction management real estate engineering facilities management and project management. **Rawlinsons Construction Cost Guide 2012** Rawlinsons Group, 2012. **Rawlinsons Construction Cost Guide 2005**, 2005.
