SAVE THIS MANUAL AND THE CODE LISTS

Remote controls can sometimes lose their programming when you change the batteries. Make sure you keep the manual and code list in a safe place so that you can reprogram the remote if you need to.

Tip: This remote is already programmed to control most RCA products. For all the DVD players and satellite receivers, just press the corresponding key—**RECORD** for a DVD player, **TV** for a satellite, **SAT/CBL** for a satellite receiver.

Step 1: Install your batteries

This universal remote requires two AA alkaline batteries.

Step 2: Program

To use this universal remote system, first you must get the codes that will make you able to operate your device.

- The **Auto Code Search** method for the device you wish to use is the easiest method, but it will require other programming work.
- The **Brand Code Search** method searches for devices of a specific brand, but it can be tedious.
- The **Manual Code Entry** method requires you to enter the code for the device you wish to use as the other methods do.

Auto Code Search

The **Auto Code Search** method is the easiest way to find the code that operates your device. It will search for the code.

NOTE: Each device has a code. The TV is preset to search for the code. The code for the device you wish to use is listed in the code list. To set without using a code list, press the **GO** button.
