Art & Science in the Choral Rehearsal Sharon J.

Paul,2020-04-01 In recent decades cognitive neuroscience research has increased our understanding of how the brain learns retains and recalls information At the same time social psychologists have developed insights into group dynamics exploring what motivates individuals in a group to give their full effort or conversely what might instead inspire them to become free loaders Art and Science in the Choral Rehearsal explores the idea that choral conductors who better understand how the brain learns and how individuals within groups function can lead more efficient productive and enjoyable rehearsals Armed with this knowledge conductors can create rehearsal techniques which take advantage of certain fundamental brain and social psychology principles Through such approaches singers will become increasingly engaged physically and mentally in the rehearsal process Art and Science in the Choral Rehearsal draws from a range of scientific studies to suggest and encourage effective evidence based techniques and can help serve to reset and inspire new approaches toward teaching Each chapter outlines exercises and creative ideas for conductors and music teachers including the importance of embedding

problem solving into rehearsal the use of multiple entry points for newly acquired information techniques to encourage an emotional connection to the music and ways to incorporate writing exercises into rehearsal Additional topics include brain compatible teaching strategies to complement thorough score study the science behind motivation the role imagination plays in teaching the psychology of rehearsal and conducting tips and advice All of these brain friendly strategies serve to encourage singers active participation in rehearsals with the goal of motivating beautiful inspired and memorable performances *Excel HSC Economics* J. Buultjens,2005 Contains comprehensive coverage of the new course chapter summaries research activities glossary of terms and useful websites
