Donna Cross, Leanne Lester

Physical Science Grade 10 Exemplar June 2014:

High-Performance Bolting Technology for Offshore Oil and Natural Gas Operations National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on Connector Reliability for Offshore Oil and Natural Gas Operations, 2018-07-12 Commercially significant amounts of crude oil and natural gas lie under the continental shelf of the United States. Advances in locating deposits and improvements in drilling and recovery technology have made it technically and economically feasible to extract these resources under harsh conditions. But extracting these offshore petroleum resources involves the possibility, however remote, of oil spills with resulting damage to the ocean and the coastline ecosystems and risks to life and limb of those performing the extraction. The environmental consequences of an oil spill can be more severe underwater than on land because sea currents can quickly disperse the oil over a large area and thus cleanup can be problematic. Bolted connections are an integral feature of deep water well operations. *High Performance Bolting Technology for Offshore Oil and Natural Gas Operations* summarizes strategies for improving the reliability of fasteners used in offshore oil exploration equipment as well as best practices from other industrial sectors. It focuses on critical bolting bolts, studs, nuts, and fasteners used on critical connections. *Leading improvement in school community wellbeing* Donna Cross, Leanne Lester, 2023-12-01 More than ever before the wellbeing of students, staff, and the school community must be a priority for principals and school leaders. *Leading Improvement in School Community Wellbeing* provides a framework for a set of high impact strategies that individually and together can be the focus of improving wellbeing across the school. The book provides school leaders with key research-based school improvement practices, authentic case studies in the form of principals' reflections, and crucially practical explanations outlining how to choose a particular practice and how to successfully embed or implement that strategy within the school. Asking: What's happening? What's working? and What's next? the three parts of the book provide tools to assess the school community's wellbeing, strengths, and needs to determine actions required to improve student and staff wellbeing and to effectively implement wellbeing strategies across the school for the benefit of the entire school community. *Physical sciences*, 2009*
